## PENSIONER

## Shaping the future of the retirement fund industry

## 2011 BENCHMARK SYMPOSIUM BY SEB

Guiding you through the changes in the Retirement Industry. To stay ahead and manage funds effectively you need the best information and analysis available. The retirement industry in South Africa is in a state of change and thus Sanlam Employee Benefits is perfectly placed to offer guidance and education to all those in the industry during this time.

## 2011 BENCHMARK SURVEY BY SEB

This comprehensive survey provides an essential tool for the management of retirement funds and constitutes a yardstick for all stakeholders to measure their funds against the latest benefit trends.

## Forward

In our hope for a better tomorrow, Sanlam is proud to present you with our annual BENCHMARK Survey results for 2011.

As this is only the second pensioner study we have completed as part of the BENCHMARK Survey, we intend to continue this study in future so that it can have the same historical significance of our retirement fund surveys that have been conducted for over three decades.

Furthermore it is the aim of the Sanlam BENCHMARK team to provide all stakeholders, including National Government, with some statistical evidence of how we could possibly assist with the improvement on the current levels of savings in South Africa. For this to be successful we need to have a deeper understanding of each household's personal balance sheet and expenditure prioritisation. We also need to have an understanding of the financial difficulties South Africans are faced with daily.

The contribution of retired individuals are invaluable in our efforts to improve savings levels in the country. We believe that the retired individuals have a wealth of knowledge and experience to share with younger South Africans.

It is Sanlam's endeavour to provide objective and usable data in order for individuals, together with their trusted financial advisors, to make informed retirement savings, investment and risk planning decisions. We trust that members will heed the messages and will demonstrate learnings by starting to provide for their retirement years much earlier than is currently the case.

Over the years, Sanlam has partnered with different stakeholders to ensure that the data is relevant and actionable. We also took the step to present a research paper on the BENCHMARK Survey at the South African Market Research Association conference two ago. This was an important step for us and you can be assured of the quality of the research output and that the research methodology is based on the most prudent data collecting methods.

As always the team has spent the last ten months tirelessly collecting, collating and analysing the data and we would like to take this opportunity to thank them for their commitment to the retirement fund industry.

I trust that like most stakeholders, you too will continually find value in the content of this research report.

## Reality check

The retirement industry in South Africa is under constant pressure to deliver adequate and sustainable retirement benefits to pensioners. Since 2010 the Sanlam Benchmark Survey has included extensive surveys for both active members and pensioners in a bid to research issues affecting both their pre- and post-retirement reality.

The results of the 2011 Pensioner Survey do not differ significantly from the 2010 results and two year's data is not enough to determine trends or make significant deductions. However, the 2011 survey again aimed to give a reflection of the current reality of pensioners in order to provide industry role players and active members with reliable information to inform their planning around retirement into the future.

Pensioners are again very clear in their advice to active members who still have the opportunity to take corrective measures:

- Start investing and saving as early as possible
- Start planning for retirement at an early age
- Make more enquiries and learn more about investments, investment choices and retirement

The advice is re-inforced by the findings of the 2011 survey, as it seems (just as in 2010) that at retirement, or only a few years into retirement, their dreams of a carefree existence are shattered due to a shortfall in retirement savings.

An alarming 80\% of pensioners have not
completely achieved their pre-determined retirement goals.

On average, $31 \%$ of the pensioners believe they have not saved enough for their capital to last for the rest of their lives and a staggering $33 \%$ of members currently have a monthly shortfall between their income and expenses.

The factors described below contribute to this situation.

The average retirement age is 58, but the average period of contribution is only 25 years, which leaves 10 years unaccounted for, if it is assumed that first formal employment begins at age 23. The ideal scenario is for active members to start saving as early as possible and for as long as possible.

An overwhelming 87\% of the pensioners indicated that members need financial advice before retirement. However only $52 \%$ of these pensioners received financial advice before retirement.

On average these pensioners received financial advice 10 years prior to retiring, although they now believe that this advice was seven years too late. Ideally, active members should receive financial advice from the first day of their working lives.

A staggering 40\% of the pensioners who received advice received this advice from their employer's HR offices as opposed to consulting a qualified financial intermediary.

In planning for retirement 42\% did not consider the fact that medical aid contributions would increase by between 10\% - 15\%.

If pensioners do take a lump sum at retirement they are encouraged to stay within the tax free limit and the lump sum should be used to repay debt only. From the survey, however, it seems that $51 \%$ of the members took a lump sum at retirement and gave it to family, made home improvements, or used it for living expenses.

As far as the post retirement vehicles are concerned, it is interesting to note that the number of pensioners who purchased Investment Linked Living Annuities increased from 5\% to 9\% and that "Withprofit" Annuities also increased from 6\% to 10\%. Guaranteed Escalation and Inflation Linked Annuities on the other hand declined in percentage. It is currently too early to make any meaningful deductions from this but it will be interesting and informative to monitor this trend going forward.

We hope that the results of the 2011 Benchmark Pensioner Survey will assist all responsible role players, members and pensioners to not only identify the gaps, shortfalls and bad habits but also to support endeavours to improve the retirement landscape and encourage good savings habits amongst members and pensioners.

## Methodology and sample

The 2010 BENCHMARK Pensioner Survey was conducted among 250 pensioners. Participation in the survey was based on individuals' already in retirement and currently in receipt of a monthly annuity income via an employer sponsored scheme or a retirement annuity fund. Pensioners only in receipt of a pension from the Government Social Assistance Pension have not been included in this sample.

The survey was conducted by an independent market research agency BDRC, through face-toface interviews

The research was conducted under the SAMRA (South African Marketing Research Association) Code of Conduct and all the information gathered is held in strict confidence. All respondents remain anonymous and only the aggregated results of the survey have been reported on.

## Sample size

The tables and graphs in this report are based on responses by 250 pensioners.

The sample size is 250 but in some instances the base size is $n \neq 250$, namely:

- $\mathrm{n}<250$ where the question was not applicable to all respondents
- $\mathrm{n}>250$ where the question allowed for multiple responses.

Caution: Data should be used with care, particularly where the number of responses or base sizes are < 30, as this is considered statistically insufficient to draw any significant industry conclusions.

## Numbering

We have tracked responses to certain questions, which allow us to determine trends for a specific period. As a result, in an attempt to retain original questions, question numbering may not be sequential.

## SECTION I

## Impact of economic recession

Q. 1 Thinking back on your own experience, the way you planned for retirement and the choices you made at the point of retirement, what SINGLE piece of financial planning advice would you give to young adults starting their careers i.e. people aged about 25 years?

|  | 2011 <br> TOTAL | 2010 <br> TOTAL |
| :--- | ---: | ---: |
| BASE: ALL RESPONDENTS | 252 | 249 |
| Do not have debt / credit | 100 | 100 |
| Do not retire too early | 4 | 4.4 |
| Don't rely on just one source of income | 5 | 0 |
|  | 2 | 0 |
| Don't squander money / waste on luxuries | 2 | 0 |
|  | 0.8 | 0 |
| Don't withdraw from your pension | 7 | 6 |
|  | 2.8 | 2.4 |
| Invest from an early age | 7 | 10 |
|  | 2.8 | 4 |
| Invest in property | 35 | 50 |
| Invest offshore | 13.9 | 20.1 |
| Make more enquiries / learn about | 11 | 5 |
| investments / retirement / learn more about | 4.4 | 2 |
| investment choices / request m | 2 | 0 |
| Put more money into my pension / increase | 11.5 | 8.4 |
| it annually / choose a higher premium | 15 | 6 |
| Save from an earlier age | 6 | 2.4 |
