### foreword

## Reflections: Looking back to make looking ahead even clearer

My team and I have been debating the concept of the "evolution of employee benefits" for the past five years. I spent some time contemplating how far we have come since 2013. This is a necessary step to gaining an understanding of how the landscape is morphing. It provides critical insights into what we need to focus on to achieve our desired future state.

Dawie de Villiers Chief Executive Officer: Sanlam Employee Benefits

Despite the macro-economic challenges which South Africa faces, we have seen a marginal increase in the employed population from 14.7 million (2013) to 15.5 million (2016) adults. According to Statistics SA, the unemployment rate based on the official number has increased from 25.3% (2013) to 26.6% (2016).

These official statistics are not comforting at all. Our member studies indicate that the two primary dependencies for financial wellness is the level of education and employment status (access to financial resources).

As an industry we need to consider the longer-term economic consequences when not all employed people have access to medical aid provision or are contributing to retirement funds. The number of employed people who have access to medical aid decreased from 31.7% (2013) to 29.8% (2016) and those contributing to a retirement fund decreased from 48.5% (2013) to 46.5% (2016).

In the past, employers may have considered the impact of the financial strain on their employees' productivity. Another consequence is the effect it has on the career trajectories of those individuals. A key finding of our member studies is that financial constraints may act as a trigger for employees to search alternative employment. This is done either to access retirement benefits or to move for more competitive or a wider range of employee benefits.

#### 5-year trends from an intermediary's perspective

Despite all the industry efforts regarding member education, the overall level of understanding around retirement benefits remains very low. Over the years we've also seen an interesting shift in demand

for various types of products. Due to economic reasons it would appear that the industry is focussing on group risk benefits (funeral cover, dread disease cover and income replacement). This is a positive trend as many members are largely under-insured. Regulatory changes are driving cost pressures which in turn are forcing the industry to reduce complexity and increase the transparency of costs. The conversion from stand-alone retirement funds to commercial umbrella funds continues unabatedly.

There also appears to be a misalignment between the employer's value proposition and the range of benefits offered.

#### Everything that matters to employees is entrenched in an employers' value proposition

We have consistently intimated that financial wellness as a nation and on an individual level requires a shift in thinking and behaviour. Merely being employed and/or earning an income (at any level) does not necessarily equate to positive financial outcomes. The key differentiators are behaviour and attitude towards money.

Employee value propositions are broadly defined as the full spectrum of benefits which an organisation delivers to its employees in return for the employees' time and skillset. It includes the total rewards package such as remuneration, retirement and risk benefits, flexible work arrangements and wellness programmes.

We tested the concept of an employee value proposition and whether it was aligned to the full suite of benefits offered. It was pleasing to see that 47% of stand-alone funds and 35% of participating employers in commercial umbrella funds indicated that their value propositions took a holistic view of their employees.

As a result, a wide range of financial and healthcare benefits including wellness, healthcare clinics, child care, financial assistance for children's education and financial planning are included in the total rewards offered. But only half of employed individuals enjoy these rewards for as long they are economically active.

#### Money conversations as a potential stimulus to bring about the change in attitude

Volumes have been written about millennials, the generation born between 1982 and 2004. Approximately one quarter (23%) of our member studies sample constitutes this generation.

We tested their attitudes on a number of issues relating to work, career and income trajectories as well as their financial wellness. What stood out for me was the candour with which young professionals speak about their career aspirations and the ability to quantify their potential future earnings.

Young professionals are indeed self-directed and want to take charge of their futures. There was little evidence to support a defined benefit mind-set. When asked about future career opportunities three key themes became apparent:

- Innovation
- Ownership and accountability
- Upskilling

Their optimism about career opportunities centres around advancements in technology across all sectors. Self-directed individuals take responsibility for personal growth and development and believe that upskilling is pivotal to their career advancement and security. However, their optimism is tempered by an overwhelming uncertainty based on a wide spectrum of macro-economic challenges. Increasingly, open architecture with a focus on holistic benefits for members will probably be the solution for this generation. They are gearing themselves up for multiple income streams from different sources. Those with less of an entrepreneurial spirit will look to corporates to provide a wide range of benefits.

For this generation the goal is not so much about money as it is about living life on their terms. It is about having options in their careers and all other aspects of their lives.

Looking back it is apparent how much has changed in five years.

As you turn the pages of this report, you will hopefully be inspired to consider our take on what the future may hold for this industry.

I wish to extend my gratitude and heartfelt appreciation to everyone who made this research possible.

#### Dawie de Villiers

CEO Sanlam Employee Benefits

## **Research methodology**

The size and the scope of the 2017 umbrella funds survey has remained largely consistent with the 2016 study. Interviews were conducted amongst 100 representatives of participating employers in umbrella funds.

by

Danie van Zyl Head: Guaranteed Investments Sanlam Employee Benefits

Janus Engelbrecht Business & Product Analyst Sanlam Umbrella Solutions Respondents were selected at random and it may be possible that some participating employers included in the survey may currently be participating in Sanlam Umbrella Solutions. Other participants may have assets invested with Sanlam Investments. As it was not a requirement of the study, we did not select respondents on the basis of their current retirement fund service providers. The entire fieldwork process is outsourced to BDRC Africa, a leading marketing research agency. This is to ensure the integrity of the data and the confidentiality of all respondents at all times.

### Interview technique

Personal interviews were conducted at the offices of the respondent with each being approximately one hour in length. At times more than one employer representative participated in the interview.

Fieldwork was conducted between February and March this year.

### Sample composition

For the purposes of this survey, the sampling frame has been defined as all participating employers in commercial umbrella schemes. This year we secured a 59% year-on-year participation in the survey. It is also the third consecutive year that we have observed a decline in the number of employers who considered providing benefits to members via an umbrella fund arrangement. The declining trend continues from 51% (2015), 43% (2016) and 38% in 2017.

Respondents were selected at random with a specific quota control to ensure that the sample was statistically and demographically representative of the retirement fund industry.

This year we retained the sample size of 100 interviews. One of the questions we often receive is whether the sample size is sufficient and robust enough to make accurate statistical inferences on the employed population. The simple answer is that a sample size of 100 for institutional research will produce an approximate margin of sampling error that is within a 6% to 10% range, and with a 95% confidence level.

This suggests that the sample size we've selected is robust and the conclusions drawn credible.

We are therefore satisfied that the sample size for this study meets statistical analysis requirements.

#### Data tables and graphs

The tables and graphs in this report are based on 100 responses. In some instances the sample responses were  $\neq$  100.

Where:

the number of responses was less than 100, the question was not applicable to all respondents

the number of responses was greater than 100, the question allowed for multiple responses

Caution: Data should be used with care, particularly where the number of responses is <30, as this is considered statistically insufficient to draw any meaningful industry conclusions.

Should you require any further details or assistance in using the contents of this report, please feel free to contact any of the BENCHMARK team members, whose details are listed at the end of this report.

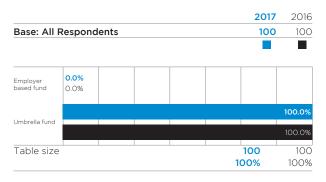

All our survey data can be accessed on www.sanlambenchmark.co.za, the BENCHMARK research portal which has been refreshed to provide a convenient, single point of access for all the research related reference material.

## **Q5.13A** Do you see a future for flexible risk benefits for your members?

### Q5.13B(i) Why?

	2017
Base: All who see a future for flexible risk benefits	41
People have different needs/ one size doesn't fit all/ members want choice as they get older and as their needs change	21
	51.2%
Gives members more control / members can choose according to their life stage/salary	12
	29.3%
The industry is moving that way / younger members demand more flexibility	3
	7.3%
Not offering at the moment - looking to offer it in the future	2
	4.9%
It would benefit members who have been with the company for a long time	2
	4.9%
We offer this already	1
	2.4%
Risk benefits have accumulated over the years - people will have to do salary sacrifices	1
	2.4%
It provides good value for the member - one pays only for what one gets	1
	2.4%
We need to consider some sort of temporary disability benefits	1
	2.4%
Table size	44
	107.3%

### Q5.13B(ii) Why not?

	2017
Base: All who don't see a future for flexible risk benefits	59
It will be too much administration for us/ we don't have the capacity to deal with it	21
	35.6%
Happy with the current benefits/no need for this/no requests from members	17
	28.8%
The size of the group makes it unmanageable/ it will be difficult to manage/ it will be too complicated	6
	10.2%
The cost is not justified/ it will increase costs	5
	8.5%
Members financial literacy rates are low/ it will add confusion to members	5
	8.5%
If a member wants more cover they can do it themselves	5
	8.5%
We want to keep it simple/ easier to deal with everyone on the same level	3
	5.1%
It is too varied	1
	1.7%
They are lower paid/ low income group - unaffordability	1
	1.7%
We make sure that members are fully covered/protected	1

Nothing	4
	4.0%
Table Size	110
	110.0%

#### Q10.10A What do you anticipate will be the benefits of the draft Default Regulation?

	2017
Base: All Respondents	100
It will help members save for retirement in a more cost effective manner	41
	41.0%
It will encourage members to preserve their retirement savings when changing jobs	47
	47.0%
It will assist members with converting their retirement savings into an income for life	32
	32.0%
It will lead to a greater use of passive investment	4
	4.0%
No benefit - it's another piece of regulation adding cost and complexity to retirement saving	22
	22.0%
Don't know	11
	11.0%
Table Size	157
	157.0%

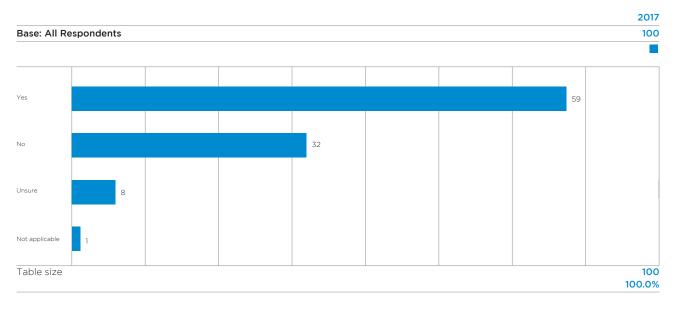

## **Q10.10B** And, do you consider that the benefits of the draft Default Regulation will justify the cost?

### **Q10.11** If "benefit counselling" goes outside of the scope of the rules of the fund and crosses the advice domain, how will the employer/fund deal with this?

	2017
Base: All Respondents	100
Our advisors will direct us as to what to do, it's done via our advisor, professional guidance will be needed	25
	25.0%
Member will have to engage services of own consultancy, private financial advisors as approved by the FSB, will outsource to broker	20
	20.0%
We will look at the situation if it arises, on a case by case basis	8
	8.0%
The service provider handles this - so it will not affect us	6
	6.0%
The fund will have to get someone to do this if they don't have it in place already, contract with a preferred CFP to ensure realistic	4
charging structure	4.0%
We would advise members up front about the potential risk and leave it up to them	4
	4.0%
We would only allow FAIS compliant counsellors to be active or involved	4
	4.0%
Would actively avoid the cross-over, we would chase them away, current policy prohibits this	3
	3.0%
We have a service level agreement - any advice given must meet the service level requirements	3
	3.0%
I would discontinue using that person as a recommended advisor, we will change our consultant	3
	3.0%
We would report them to the FSB ombudsman, fund	3
	3.0%
Employees will have to carry the extra cost	2

None	51
	79.7%
Table Size	70
	109.4%

#### Q12.20A With regards administration fees on beneficiary funds, do you think these should be expressed as a?

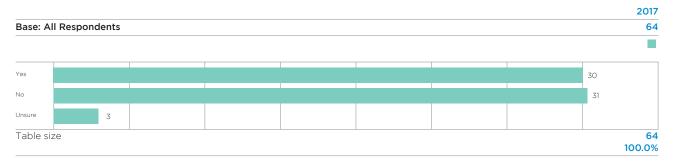

#### Q12.20B Why do you say that?

	2017
Base: All who think fees on beneficiary funds should be expressed as a fixed fee	46
Know upfront what they are paying each month/ easier to budget	14
	30.4%
Same amount of work is required/Don't do anything extra to warrant a percentage of assets	11
	23.9%
Same to everybody - irrespective of the amount invested in the fund/ its equal to everybody	9
	19.6%
A fixed fee is easier to manage/ there is not a lot of admin work in the fund	7
	15.2%
It is fair to have a fixed fee because assets are changing	6
	13.0%
Fixed costs on small funds are disproportionately large	3
	6.5%
Other	7
	15.2%
Don't know	1
	2.2%
Table Size	58
	126.1%

#### Q12.20B Why do you say that?

	2017
Base: All who think fees on beneficiary funds should be expressed as a percentage of assets	14
Fixed costs on small funds are disproportionately large/flat fee will take too much of a small fund/fair for smaller investors	7
	50.0%
The more you have the more you pay/Fee should be determined by the level of assets	3
	21.4%
It is fair to have a fixed fee because assets are changing	1
	7.1%
There are pros and cons - pecentage seems harsh	1
	7.1%
Guardians will know upfront how much the admin fee is going to cost	1
	7.1%
As time goes on and beneficiaries are paid out the fund assets will diminish	1
	7.1%
Assets are not their large amounts	1
	7.1%
Table Size	15
	107.1%

## **Q12.21** Do you think members should have the option to choose a beneficiary fund in their beneficiary nomination forms?
