DIRECTORS' REPORT

The Directors of Sanlam Qualifying Investors Funds plc (the "Company") present herewith their Annual Report together with the audited financial statements for the year ended 31 December 2017.

RESULTS AND BUSINESS ACTIVITIES

Detailed investment reviews are included in the Reports of the Investment Manager from pages 20 to 32. The results of operations are set out in the Statement of Comprehensive Income on pages 33 to 37.

The Directors also draw your attention to the significant events during the year explained in note 22 on page 136.

PRINCIPAL RISKS AND UNCERTAINTIES

The Company is exposed to the risks associated with the financial instruments and markets in which the Funds invest. The Directors draw your attention to note 18 on pages 108 to 132 which outlines the financial risks associated with meeting the Company's investment objectives. The Directors are not aware of any existing or contingent liability of the Funds that may expose the assets of the Company as a whole.

DIVIDENDS

The Directors have no current intention to make distributions from any Fund. All such profits shall be retained in the relevant Fund.

DIRECTORS

The Directors of the Company during the year were as follows:

- Paul Dobbyn (Irish)
- Thomas Murray (Irish)
- Haydn Franckeiss (South African)
- Richard Aslett (British)

Paul Dobbyn is a Director of Sanlam Global Funds Plc and Sanlam Universal Funds Plc.

Thomas Murray is a Director of Sanlam Global Funds Plc and Sanlam Universal Funds Plc. Thomas Murray is also a Director of Sanlam Asset Management (Ireland) Ltd. ("SAMI").

Haydn Franckeiss is also a Director of Sanlam Global Funds Plc and Sanlam Universal Funds Plc.

Richard Aslett is the Chief Executive Officer of SAMI. Richard Aslett is also a Director of Sanlam Global Funds Plc, Sanlam Universal Funds Plc and SAMI.

DIRECTORS' REPORT (CONTINUED)

DIRECTORS' AND SECRETARY'S INTEREST IN SHARES AND CONTRACTS

The Directors, who held office on 31 December 2017, had no interest in the shares of the Company or Funds at that date or at any time during the financial year. None of the Directors has a service contract with the Company. The Manager holds non-participating shares of the Company as explained in the notes to the Financial Statements.

RELATED PARTIES

Disclosures in respect of related parties are contained in note 12 to the Financial Statements.

CONNECTED PARTIES

The Central Bank of Ireland AIF Rulebook section on "Dealings by management company, general partner, depositary, AIFM, investment manager or by delegates or group companies of these" states that any transaction carried out with the Company by a management company, general partner, depositary, AIFM, investment manager or by delegates or group companies of these ("Connected Parties") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Board of Directors is satisfied there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out above are applied to all transactions with Connected Parties entered into during the year and that all such transactions have complied with these obligations.

ACCOUNTING RECORDS

The measures taken by the Directors to ensure compliance with the Company's obligation to keep proper accounting records are the use of appropriate systems and procedures which are carefully implemented by the Administrator. The accounting records of the Company are kept at Beech House, Beech Hill Road, Dublin 4, Ireland.

DIRECTORS' STATEMENT ON RELEVANT AUDIT INFORMATION

Each of the Directors at the date of approval of the Directors' Report confirms that:

- a) So far as the Directors are aware, there is no relevant audit information of which the Company's statutory auditor is unaware; and
- b) The Directors have taken all the steps that they ought to have taken as Directors in order to make themselves aware of any relevant audit information and to establish that the Company's statutory auditor is aware of that information.

This confirmation is given and should be interpreted in accordance with the provisions of section 330 of the Companies Act 2014.

SUBSEQUENT EVENTS

Other than as disclosed in note 23, up to the date of the approval of these financial statements there were no events subsequent to the year end, which, in the opinion of the Directors of the Company, may have had an impact on the financial statements for the year ended 31 December 2017.

DIRECTORS' REPORT (CONTINUED)

STATEMENT OF DIRECTORS' RESPONSIBILITIES

Irish company law requires the Directors to prepare financial statements for each financial year which give a true and fair view of the state of affairs of the Company and of the results of the Company for that year. In preparing those financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- follow applicable accounting standards or disclose or explain material departures from them in the financial statements;
- provide a fair review of the development and performance of the Company;
- give a description of principal risks and uncertainties that they face; and

Prepare the financial statements on the going concern basis, unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper accounting records which disclose with reasonable accuracy, at any time, the financial position of the Company and to enable them to ensure that the financial statements are prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and comply with the Irish Companies Act, 2014. They are also responsible for safeguarding the assets of the Company and in fulfilment of this responsibility, they have entrusted the assets of the Company to the Depositary for safekeeping, in accordance with the Memorandum and Articles of Association of the Company. The Directors are responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

CORPORATE GOVERNANCE CODE

The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I.83 of 2010) (the "Regulations") requires the inclusion of a corporate governance statement in the Directors' Report.

Although there is no specific statutory corporate governance code applicable to Irish collective investment schemes whose shares are admitted to trading on the Irish Stock Exchange (ISE), Irish Funds ("IF") has published a corporate governance code ("IF Code") that may be adopted on a voluntary basis by Irish authorised collective investments schemes. This code became effective from 1 January 2012, with a twelve month transitional period. It should be noted that the IF Code reflects existing corporate governance practises imposed on Irish authorised collective investment schemes, as noted above.

On 19 December 2012, the Board of Directors voluntarily adopted the IF Code as the Company's corporate governance code. The Board of Directors has assessed the measures included in the IF Code as being consistent with its corporate governance practises and procedures for the financial year. The code is available at www.sanlam.ie.

DIRECTORS' REPORT (CONTINUED)**CORPORATE GOVERNANCE CODE (CONTINUED)**

In addition to the IF Code, the Company is subject to corporate governance practices imposed by:

- i) The Irish Companies Act 2014 which is available for inspection at the registered office of the Company. It may also be obtained at <http://www.irishstatutebook.ie/eli/2014/act/38/enacted/en/html>.
- ii) The Articles of Association of the Company which are available for inspection at the registered office of the Company at Beech House, Beech Hill Road, Dublin 4, Ireland and the Companies Registration Office in Ireland.
- iii) The Central Bank of Ireland in their AIF Rulebook for Qualified Investor AIFs which can be obtained from the Central Bank of Ireland website at <https://www.centralbank.ie/regulation/industry-market-sectors/funds> and are available for inspection at the registered office of the Company.
- iv) The ISE through the Global Exchange Market Rules for Investment Funds which can be obtained from the ISE's website at <http://www.ise.ie/Products-Services/Investment%20Funds/List-a-Fund/#ProductGuides>.
- v) SAMI's Programme of Activity, Business Plan and Code of Conduct, which is available for inspection at the registered office of SAMI at Beech House, Beech Hill Road, Dublin 4, Ireland.
- vi) SAMI is also subject to the Corporate Governance Code of the Sanlam Group.

The Board of Directors is responsible for establishing and maintaining internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement and loss. The Board of Directors has delegated this duty to SAMI.

SAMI is appointed as administrator to maintain the books and records of the Company. SAMI is authorised and regulated by the Central Bank of Ireland and must comply with the rules imposed by the Central Bank of Ireland. SAMI also monitors and evaluates the external auditor's performance, qualifications and independence.

The Company has procedures in place to ensure all relevant books of accounts are properly maintained and are readily available, including production of annual financial statements. The annual financial statements of the Company are required to be approved by the Board of Directors of the Company and filed with the Central Bank of Ireland and the ISE.

The statutory financial statements are required to be audited by the independent auditors who report annually to the Board on their findings. The Board of Directors evaluates and discusses significant accounting and reporting issues as the need arises.

Shareholders' meetings

The convening and conduct of shareholders meetings are governed by the Articles of Association of the Company and the Companies Act. Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors of the Company are required to convene a general meeting within eighteen months of incorporation and fifteen months of the previous annual general meeting thereafter. Shareholders representing not less than one-tenth of the paid up share capital of the Company may also request to convene a shareholders meeting. Not less than twenty one days' notice of every annual general meeting and any meeting for the passing of a special resolution must be given to shareholders and fourteen days' notice must be given in the case of any other general meeting unless the auditors of the Company and all the shareholders entitled to attend and vote agree to shorter notice.

Two members, present either in person or by proxy, constitute a quorum at a general meeting provided that the quorum for a general meeting convened to consider any alteration to the class rights of shares is two shareholders holding or representing by proxy at least one third of the issued shares of the relevant Funds or class.

DIRECTORS' REPORT (CONTINUED)**CORPORATE GOVERNANCE CODE (CONTINUED)****Shareholders' meetings (continued)**

Every holder of participating shares or non-participating shares present in person or by proxy who votes on a show of hands is entitled to one vote. On a poll, every holder of participating shares present in person or by proxy is entitled to one vote in respect of each share held by him and every holder of non-participating shares is entitled to one vote in respect of all non-participating shares held by him. The chairman of a general meeting of the Company, or at least two members present in person or by proxy, or any holder or holders of participating shares present in person or by proxy representing at least one-tenth of the shares in issue having the right to vote at such meeting, may demand a poll.

Shareholders may decide to sanction an ordinary resolution or special resolution at a shareholders' meeting. An ordinary resolution of the Company (or of the shareholder of a particular Funds or class) requires a simple majority vote cast by the shareholders voting in person or by proxy at the meeting at which the resolution is proposed. A special resolution of the Company (or of the shareholders of a particular Fund or class) requires a majority vote of not less than 75% of the shareholders present in person or by proxy and voting in general meeting in order to pass a special resolution including a resolution to amend the Articles of Association.

Composition and Operation of the Board

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors may not be less than two. Currently the Board of Directors of the Company is composed of four Non-Executive Directors, being those listed on page 1 of these financial statements with Paul Dobbyn, Thomas Murray and Richard Aslett being Irish residents. None of the Company's Directors hold common directorships with the Depositary.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are not required in accordance with the Companies Acts or the Articles of Association to be exercised by the Company in a general meeting.

A Director may, and the company secretary of the Company on the requisition of a Director will, at any time, summon a meeting of Directors. Questions arising at any meeting of Directors are determined by a majority of votes. In the case of quality of votes, the chairman has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

SAMI has been appointed the Alternative Investment Fund Manager ("AIFM") to the Company and its Funds pursuant to the European Union (Alternative Investment Fund Managers) Regulations 2013 (the "AIFM Regulations"). The AIFM Regulations apply to SAMI and consequently to the management and operation of the Company. SAMI has been approved by the Central Bank of Ireland as the AIFM and is therefore required to comply with all duties, obligations and functions of an AIFM as are contained in the AIFM Regulations, the Commission Delegated Regulation (EU) No 231/2013 of 19 December 2012 supplementing the AIFMD, the Central Bank of Ireland's AIF Rulebook and SAMI's Programme of Activity as they apply to the services it provides to the Company and the Funds.

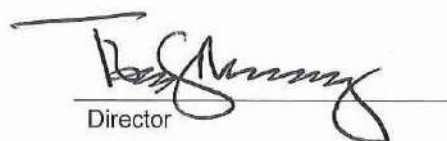

AUDITORS

The Auditors, Ernst & Young, have indicated their willingness to continue in office in accordance with Section 383 (2) of the Companies Act 2014.

On behalf of the Board of Directors

Director

24 April 2018

Director

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

Opinion

We have audited the financial statements of Sanlam Qualifying Investor Funds plc ("the company") for the year ended 31 December 2017, which comprise the Statement of Comprehensive Income, Statement of Financial Position, Statement of Changes in Net Assets attributable to Holders of Redeemable Participating Shares, Statement of Cash Flows, Portfolio of Investments and notes to the financial statements, including the summary of significant accounting policies set out in note 2. The financial reporting framework that has been applied in their preparation is Irish Law and International Financial Reporting Standards (IFRS) as adopted by the European Union as applied in accordance with the provisions of the Companies Act 2014.

In our opinion the financial statements:

- give a true and fair view of the assets, liabilities and financial position of the company as at 31 December 2017 and of its profit for the year then ended;
- have been properly prepared in accordance with IFRS as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Companies Act 2014.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the company in accordance with ethical requirements that are relevant to our audit of financial statements in Ireland, including the Ethical Standard as applied to public interest entities issued by the Irish Auditing and Accounting Supervisory Authority (IAASA), and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters, in relation to which ISAs (Ireland) require us to report to you where:

- the directors' use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the directors have not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the company's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit; and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>Valuation of financial assets and financial liabilities at fair value through profit or loss excluding collective investment schemes</p> <p>We have considered valuation of financial assets at fair value through profit or loss (with a fair value of USD 384 million (2016: USD 217 million) as a key audit matter as it is a key driver of the company's performance and net asset value.</p> <p>Refer to Note 10, Financial instruments and associated risks in the Financial Statements.</p>	<p>We obtained the listing of financial assets and financial liabilities at fair value through profit or loss as at 31 December 2017 from the company's Administrator.</p> <p>We assessed the reasonableness of the valuation of financial assets and financial liabilities at fair value through profit or loss, by comparing the company's valuation to quoted prices obtained from independently available market sources.</p> <p>We assessed the reasonableness of the valuation of equity linked notes and warrants by using Bloomberg market data and industry accepted valuation model.</p>	<p>Based on the procedures performed, no issues were noted.</p>

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

Risk	Our response to the risk	Key observations communicated to the Audit Committee
<p>The company also invests in collective investment schemes and valued these schemes at the last available net asset value per share calculated by the underlying administrator. As of 31 December 2017, the fair value of the company's investments in collective investment schemes is USD 539 million (2016: USD 426 million)</p>	<p>We evaluated the valuation methodology applied to determine the fair value of the company's investments in the collective investment schemes.</p> <p>There are two types of collective investment schemes investments, one where the investments were made in frequently trading funds and the other where the investments were made in hedge funds.</p> <p>We tested the valuation of frequently trading funds using net assets value available on independently available market sources</p> <p>We tested the value of hedge funds using the net asset values of the underlying funds at 31 December 2017 received independently from the underlying collective investments schemes' administrators.</p>	<p>Based on the procedures performed, no issues were noted.</p>

Our application of materiality

We apply the concept of materiality in planning and performing the audit, in evaluating the effect of identified misstatements on the audit and in forming our audit opinion.

Materiality

Materiality is the magnitude of an omission or misstatement that, individually or in the aggregate, could reasonably be expected to influence the economic decisions of the users of the financial statements. Materiality provides a basis for determining the nature and extent of our audit procedures.

We determined materiality for the company to be 0.5% (2016: 0.5%) of Net Asset Value. We believe that Net Asset Value is appropriate measurement basis since the users of the financial statements may focus more on this than on earnings.

During the course of our audit, we reassessed initial materiality and made no changes to it.

Performance materiality

Performance materiality is the application of materiality at the individual account or balance level. It is set at an amount to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds materiality.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

On the basis of our risk assessments, together with our assessment of the company's overall control environment, our judgement was that performance materiality was 75% (2016: 75%). We have set performance materiality at this percentage due to our knowledge of the entity and industry, our past history with the entity, the effectiveness of its control environment and our assessment of the risks associated with the engagement.

Reporting threshold

Reporting threshold is an amount below which identified misstatements are considered as being clearly trivial.

We agreed with the board of directors that we would report to them all uncorrected audit differences in excess of 5% (2016: 5%), as well as differences below that threshold that, in our view, warranted reporting on qualitative grounds.

We evaluate any uncorrected misstatements against both the quantitative measures of materiality discussed above and in light of other relevant qualitative considerations in forming our opinion.

An overview of the scope of our audit report

Our assessment of audit risk, our evaluation of materiality and our allocation of performance materiality determine our audit scope for the company. This enables us to form an opinion on the financial statements. We take into account size, risk profile, the organisation of the company and effectiveness of controls, including controls and changes in the business environment when assessing the level of work to be performed. All audit work was performed directly by the audit engagement team.

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2014

Based solely on the work undertaken in the course of the audit, we report that:

- in our opinion, the information given in the directors' report is consistent with the financial statements; and
- in our opinion, the directors' report is have been prepared in accordance with the Companies Act 2014.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

We have obtained all the information and explanations which we consider necessary for the purposes of our audit.

In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited and the statement of financial position is in agreement with the accounting records.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

The Companies Act 2014 requires us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions required by sections 305 to 312 of the Act are not made. We have nothing to report in this regard.

Respective responsibilities

Responsibilities of directors for the financial statements

As explained more fully in the Statement of Directors' responsibilities set on page 5, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as going concerns, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

The objectives of our audit, in respect to fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses; and to respond appropriately to fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SANLAM QUALIFYING INVESTOR FUNDS PLC

We obtained an understanding of the legal and regulatory frameworks that are applicable to the company and determined that the most significant is the Companies Act 2014 and Alternative Investment Fund Managers Directive 2011.

We understood how Sanlam Qualifying Investors Funds plc is complying with those frameworks by updating our understanding of the system of internal control in place. We also considered the existence of independent service providers, proper segregation of duties and the regulated environment in which the company operates, which may reduce opportunities for fraud to take place. We assessed the susceptibility of the company's financial statements to material misstatement, including how fraud might occur by management override of controls.

Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved inquiries to those charged with governance into possible instances of non-compliance with laws and regulations, review of board meeting minutes during the year and obtaining representation from the management.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA's website at: http://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditor's report.

Other matters which we are required to address

We were appointed by the Directors in 2011 to audit the financial statements for the year ended 31 December 2011 and subsequent financial periods. The period of total uninterrupted engagement including previous renewals and reappointments of the firm is 7 years.

The non-audit services prohibited by IAASA's Ethical Standard were not provided to the company and we remain independent of the company in conducting our audit

Our audit opinion is consistent with the additional report to the board of directors.

The purpose of our audit work and to whom we owe our responsibilities

Our report is made solely to the company's members, as a body, in accordance with section 391 of the Companies Act 2014. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report.

Report of the Depositary to the Shareholders

We have enquired into the conduct of Sanlam Qualifying Investors Funds plc (the "Company") for the period 1 January to 31 December 2017, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the shareholders in the Company in accordance with the Central Bank's AIF Rulebook Chapter 6 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in the Central Bank's AIF Rulebook Chapter 6 (as amended). One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the European Communities Alternative Investment Fund Managers Directive 2011/61/EU as amended, and Commission Delegated Regulations (EU) No. 231/2013 as amended, (the "Regulations"). It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in the AIF Rulebook Chapter 6 (as amended) and to ensure that, in all material respects, the Company has been managed:

- (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of its constitutional documentation and the Regulations; and
- (ii) otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion the Company has been managed during the period in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association and by the Central Bank under the powers granted to it by the Companies Act, 2014 Part XIIV and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association and the Companies Act, 2014 Part XIIV and the Regulations.

MANAGER'S REPORT

Sanlam Asset Management (Ireland) Limited ("SAMI" or the "Manager") presents herewith the Manager's Report for the year ended 31 December 2017.

SAMI has been appointed to serve as the Company's administrator and Alternative Investment Fund Manager ("AIFM") and to manage the assets of each Fund in accordance with its investment objective and policies as determined by the AIFM and any subsequent changes thereto.

As the AIFM, SAMI has responsibility for the management and administration of the Company's affairs and distribution of the Shares, subject to the overall supervision and control of the Directors of the Company. SAMI has delegated the performance of certain of its investment management functions in respect of the Company to the Investment Allocation Manager and the Investment Managers. In addition, SAMI has delegated the performance of certain of its distribution functions in respect of the Company to the Distributors. SAMI has also delegated certain of its administrative functions to the Depositary and to the Registrar & Transfer Agent of the Company. These delegation arrangements have been notified to the Central Bank and made in accordance with SAMI's outsourcing/delegation policy, its Programme of Activity, the AIFM Regulations and the AIF Rulebook. SAMI will notify the Central Bank before any further delegation becomes effective and will be able to justify its entire delegation structure with objective reasons.

Performance and Investment Activities

An overall review of the economic environment is detailed in the Economic and Market Review on pages 18 to 19.

The performance and investment activities of the individual Funds of the Company are set out in the Investment Managers' reports on pages 20 to 32.

Risk Profiles and Limits

As AIFM, SAMI has established and implemented quantitative and qualitative risk limits for each of the Funds of the Company, taking into account all relevant risks.

For each Fund, SAMI has in place a set of agreed investment restrictions which are designed to ensure each Fund is managed in accordance with its investment objective. Full details of investment restrictions applicable to each Fund are set out in the relevant Fund supplement. These investment restrictions are also designed to manage market, liquidity, credit and counterparty risks. The investment restrictions are agreed by the Board of the Company in advance of a Fund launch and are notified to the delegate investment manager(s) of the relevant Fund. Investment restrictions are monitored daily by the delegate Investment Manager(s) and the AIFM and any issues are notified to the Board of the Company on an ad-hoc basis as required.

SAMI employs risk management systems to measure and monitor relevant risks for each Fund under management. The risk management systems include:

- monitoring of compliance and quantitative limits;
- monitoring of absolute and relative investment performance;
- monitoring of Fund liquidity to ensure the liquidity or illiquidity of a Fund is consistent with that Fund's underlying obligations and stated liquidity requirements;
- monitoring global exposure and leverage;
- assessing appropriateness and on-going monitoring of delegates and counter-parties; and
- monitoring and assessing control weaknesses, breaches and errors.

The financial risk disclosures relating to the Company's risk framework and the market risk, liquidity risk, credit and counterparty risk for each Fund are set out in note 18 of the notes to and forming part of the audited financial statements on pages 108 to 132.

MANAGER'S REPORT (CONTINUED)

Other Risks

In addition to market risk, liquidity risk, credit and counterparty risk, the following other risks have been identified by the AIFM as being relevant to the Funds of the Company.

Concentration Risk

The Funds may invest in a limited number of investments and investment themes. A consequence of a limited number of investments is that performance may be more favourably or unfavourably affected by the performance of an individual investment.

Operational Risk

Operational risk is the potential for loss caused by a deficiency in information, communications, transaction processing and settlement and accounting systems. The Funds' service providers, including SAMI, maintain controls and procedures for the purpose of managing operational risk.

Legal, Tax and Regulatory Risks

Legal, tax and regulatory changes could occur during the duration of a Fund which may adversely affect the Fund. SAMI and the appointed delegate Investment Managers monitor the international regulatory environment closely for any legislation or regulatory changes that may impact the Funds. Appropriate information on such matters is considered by the AIFM and referred to the Board of Directors of the Company, where required.

Non-Developed/Emerging Market Risk

A Fund may invest a portion of its capital in securities and companies based in non-developed or emerging markets or issued by governments of such countries. Investing in the securities of such companies and countries involves certain considerations not usually associated with investing in securities of developed market companies or countries, including, without limitation, less liquidity, greater price and foreign currency volatility, and greater legal, tax and regulatory risks.

Sanlam Institutional Equity Flexible Fund, Sanlam Institutional Balanced Fund and Sanlam Institutional Bond Fund have no significant exposure to non-developed markets.

Small Capitalisation Companies Risk

A Fund may invest a portion of its capital in securities of companies with smaller capitalisation. Smaller capitalisation companies are generally not as well known to the investing public and have less investor following than larger capitalisation companies. Investing in the securities of such companies may involve certain considerations, including, without limitation, less liquidity, greater price volatility, and risks associated with limited operating histories and/or the availability of information pertaining to the Fund and its operations.

Material Changes

The AIFMD requires certain information to be made available to investors in AIFs, including the Company, before they invest and requires that material changes to this information be disclosed in the annual report. The Company's Prospectus and the Supplement of each Fund of the Company, which sets out information on the Company's investment strategy and policies, leverage, risk, liquidity, administration, management, fees, conflicts of interest and other shareholder information is available on the AIFM's website at www.sanlam.ie. There have been no material changes (other than those reflected in these financial statements) to this information requiring disclosure. Any information requiring immediate disclosure pursuant to the AIFMD will be disclosed to shareholders as and when it arises.

Portfolio Overview

The portfolios held by the individual Funds are disclosed on pages 53 to 65.

MANAGER'S REPORT (CONTINUED)

Assets Subject to Special Arrangements

With the exception of the side pocket noted in Note 18 (ii) in respect to Sanlam Global Fund of Hedge Funds, there have been no assets, in any of the Funds, subject to special arrangements, as per Article 108(2) of the AIFMD Level II Delegated Regulations, during the reporting period or at the year end.

SAMI Remuneration Policy

The remuneration policy of the Manager for the year ended 31 December 2017 is disclosed on pages 142 to 146.

Leverage

The risk limits in respect to leverage and global exposure are set by the AIFM. The leverage ratios of each Fund of the Company, as determined using the methodologies prescribed under the AIFMD, are disclosed on pages 147 to 148.

ECONOMIC & MARKET REVIEW*for the year ended 31 December 2017***Global Economics Review**

Whereas political developments featured prominently in headlines, the global economic expansion continued in 2017. A notable feature was the increase in capital equipment spending, amidst elevated levels of business confidence

Growth remained firm in the US, supporting a buoyant labour market. The year also witnessed the finalisation of comprehensive US tax reform policy. Included in the range of tax changes, to be implemented from 2018, is tax relief for households, a decrease in the corporate tax rate and a more generous expensing allowance for capital investment.

In Europe, news flow during the first six months of the year was dominated by elections in The Netherlands and France. The defeat of Euro-sceptic parties at the polls was followed by material appreciation of the euro against the US\$ through the year, despite lingering uncertainty due to an inconclusive result in Germany's September 2017 election.

At the same time, real GDP growth surprised to the upside in the Euro area, led by solid growth in Germany. Given improving labour markets, the initial export-led recovery broadened to include firmer domestic final demand growth. After lagging for a number of years, the Euro area closed the GDP growth-gap with the US.

In the UK, following the sharp depreciation of pound sterling in 2016, domestic demand and overall GDP recorded moderate growth in 2017, against a background of higher inflation, soft consumer confidence and a shift towards a less accommodative monetary policy stance by the Bank of England. The 25bp hike in the Bank rate in November 2017 was the first increase in the policy rate since 2007.

Uncertainty around negotiations to establish the terms for the withdrawal of the UK from the European Union lingered through the year. In early December 2017, however, some progress was evident given the announcement of an agreement, in principle, on UK and EU citizens' rights, the financial compensation to be paid by the UK and the maintenance of an "open border" between the UK and Ireland.

Elevated risk appetite levels and relatively easy access to foreign funding; in addition to the increase in commodity prices since 2016 and firm real economic activity in DM, continued to support economic growth in emerging markets (EM) in 2017. China remained a focal point. The country began 2017 on a cautious note as President Xi Jinping reportedly indicated to the Communist Party's financial and economic leadership group that the country's GDP growth target of 6.5 per cent should not be pursued at the expense of financial stability. But, despite a high debt level and surplus capacity in some industries, China maintained robust growth through the year, driven by infrastructure spending and exports.

Against the background of firming real economic activity, the unemployment rate for developed economies (DM), in aggregate, declined to the level prevailing before the Global Financial Crisis (GFC). Robust labour markets did not, however, translate into significant wage and inflation pressure. Developed economies' headline consumer price inflation did increase in the latter half of 2017, but core inflation rates remained low, including US core consumer price inflation. Even so, the US Federal Open Market Committee (FOMC) continued on its gradual interest rate hiking path, increasing the Federal Funds Target Rate by 25bp three times through the year to a level of 1.25% to 1.50% by December 2017.

The US Federal Reserve also announced the start of "normalisation" of its balance sheet in October 2017, signalling its intention to no longer reinvest the principal repayments of its investments (subject to a cap). In contrast, the European Central Bank (ECB) continued with its asset purchase programme throughout the year, although its monthly net asset purchases were reduced from April 2017.

ECONOMIC & MARKET REVIEW (CONTINUED)

for the year ended 31 December 2017

Global Economic Outlook

Available data for the opening months of 2018 point to moderation in global industrial production from the final quarter of 2017. The slowdown was most pronounced in DM. But, despite easing off its recent peak, global manufacturing PMI data, including in DM, remained elevated in early 2018 - consistent with continued positive industrial production growth.

Amidst buoyant confidence surveys, a recovery in global capital expenditure, a decline in unemployment rates and expansionary US fiscal policy (although fiscal multipliers tend to be smaller at full employment), the global economic recovery appears set to continue through 2018. Real global GDP growth may firm relative to 2017 if the nascent upswing in capital expenditure broadens and gathers momentum, although the economy could be in the maturing phase of the business cycle. In the opening months of 2018 global inflation remained relatively subdued, notably in DM. Some evidence has emerged of increasing intermediate and capital goods prices. But, this has not yet filtered through into final goods prices.

However, despite relatively low, stable inflation, the US Federal Reserve is mindful of the risk posed by the country's low unemployment rate to wage growth and, potentially, inflation. An added complication for US monetary policymakers is the additional fiscal expansion announced while the economy is close to full employment. The risk is a lower than expected fiscal multiplier and a higher than expected increase in interest rates. On balance, the US FOMC is expected to continue along its moderate, but persistent interest rate hiking path.

Elsewhere, the ECB recanted its easing monetary policy bias in March 2018 by removing the clause, which indicated the ECB "stands ready to increase (quantitative easing) in terms of size and/or duration" if needed. Given an improving Euro area economy, the Bank is expected to end its asset purchases in September 2018, while, possibly increasing its key policy interest rates from 1H19. The outlook for EM economies also remains favourable, but is, in part dependent on the scale of expected DM monetary policy tightening and China's ability to avoid a sharp slowdown in activity.

Should the decline in unemployment rates in DM countries reach a point where significant upwards pressure on wage growth is evident, more aggressive monetary policy tightening could impact EM adversely, with higher interest rates constraining demand and real economic activity.

Meanwhile, given the apparently excessively high level of leverage in China's economy, there is an ongoing focus on financial system stability. The country's policymakers have implemented measures to ease risks associated with excessive debt levels and the country appears to have the ability to engineer a gradual macroeconomic adjustment. It is helpful that real economic activity remained robust early in 2018, supported by firm industrial production and fixed asset investment. Even so, a sharper than expected correction remains a risk. Ultimately, it may be increasingly difficult to balance the trade-off between growing the economy and cooling credit demand. Looking ahead, policy support for economic activity could be curbed, including measures to constrain credit extension and infrastructure spending.

Other key potential risks to the outlook include any excessive shift towards trade protectionism. The US administration has revealed its willingness to use targeted import tariffs to curb specific imports from particular countries. Of immediate concern is the potential for the deterioration in trade relations with China, as well as uncertainty around the future shape and form of the North American Free Trade Agreement. Generally, should global free trade arrangements be eroded, this would likely have adverse consequences in the long-run for global growth and inflation.

Finally, as regards geo-political developments risks could escalate should talks between US President Trump and North Korea's leader Kim Jong-un fail, or if the US does not extend the deal to restrain Iran's nuclear programme, which could lead to sanctions on Iran oil exports and a general deterioration in political relations. And, the outcome of Italy's March 2018 general election suggests Euro-scepticism risk lingers in Europe, where a decisive shift towards a fiscal union is needed to contribute to long-term economic stability.

SANLAM INSTITUTIONAL EQUITY FLEXIBLE FUND

Investment Objective

Sanlam Institutional Equity Flexible Fund (the “Fund”) aims to provide long-term capital growth by investing globally across all financial markets in a diverse range of instruments but primarily investing in equity and equity type instruments.

Fund Performance

Note: The Fund benchmark is the MSCI Europe Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and AIFM fees.

The Fund underperformed its benchmark (MSCI Europe Index) by -0.90% over the course of 2017 with the Fund and benchmark advancing 24.60% and 25.51% respectively over this period. The Fund lagged its benchmark in all quarters except the fourth quarter. In chronological order, the Fund returned 7.01%, 7.18%, 5.96% and 2.53% during the respective quarters. Over the same discrete time periods, the Fund returned -0.43%, -0.19%, -0.49% and +0.32% relative to its benchmark. The Fund lags its benchmark by -4.32% on an annualised basis since inception.

Fund Outlook

2017 saw the first major co-ordinated upturn in economic growth for a number of years, and this is set to continue into 2018. The major issue here is how long can this last for, and the extent to which this is cyclical. This upturn in economic growth would traditionally be associated with increases in inflation, but in this cycle, and economic cycles definitely still exist, inflation has remained subdued. The debate within markets, perhaps more indirectly than directly, is will inflation come through: how fast, to what extent, and where first; these are just a few of the related questions. With this economic backdrop the outlook for capital markets remains positive overall. The increased economic activity should help companies deliver earnings to shareholders, which in turn, even if valuation levels remain the same, should mean that equity markets continue to progress. So the outlook for investors is expected to continue with the positive feel that has been cemented during 2017. This significant positive investor sentiment is clearly evident in markets at the start of 2018 as investors are gaining in optimism and confidence. In the end this will bring markets down, once this has been overdone, but for now this is likely to provide support to markets. Within equity markets price-earnings ratios are in most regions now at or above historical averages, and in places like the USA are definitely in the upper percentiles of their historical averages.

SANLAM INSTITUTIONAL EQUITY FLEXIBLE FUND *(CONTINUED)*

Fund Outlook *(continued)*

Market participants are aware of these valuation issues and have generally chosen for now, not to ignore them, but to be cognisant of them, and to monitor them whilst still seeking to participate in markets. There remain a number of other risks to the global economy, these include: a significant slowdown in China, which has so far been averted; political events, such as the Italian election, and Merkel's ability to form a government in Germany; there is also a potential for international trade wars, especially with Trump's America First mantra; and as the recent US government shutdown indicates there are also other factors out there, that could start off small but grow into material threats. This all said we think that the market will continue to focus on the upturn in economic growth and the low inflation environment, and that markets can then continue to make progress.

Investment Manager

Sanlam Investment Management (Pty) Limited

SANLAM INSTITUTIONAL BALANCED FUND

Investment Objective

Sanlam Institutional Balanced Fund (the “Fund”) aims to provide long-term capital growth by investing globally across all financial markets in a diverse range of instruments.

Fund Performance

Note: The Fund benchmark is a composite benchmark (45% US/ 40% EU/ 15% GB). Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and AIFM fees.

The Fund had another impressive year in terms of relative performance, outperforming the benchmark (45% 7 Day USD LIBID, 40% 7 Day EUR LIBID and 15% 7 Day GBP LIBID) by +8.13%. Indeed, absolute returns over the same period reached 15.19%. The Fund achieved strong returns across quarters one, two and four, gaining +1.62%, +3.05% and +4.35% in relative terms respectively. It did, however, give some performance back in Q3, in which it underperformed by -1.43%. The Fund has outperformed its benchmark on an annualised basis since inception by +5.28%, having gained 3.94% in annualised absolute terms.

Fund Outlook

2017 saw the first major co-ordinated upturn in economic growth for a number of years, and this is set to continue into 2018. The major issue here is how long can this last for, and the extent to which this is cyclical. This upturn in economic growth would traditionally be associated with increases in inflation, but in this cycle, and economic cycles definitely still exist, inflation has remained subdued. The debate within markets, perhaps more indirectly than directly, is will inflation come through: how fast, to what extent, and where first; these are just a few of the related questions. With this economic backdrop the outlook for capital markets remains positive overall. The increased economic activity should help companies deliver earnings to shareholders, which in turn, even if valuation levels remain the same, should mean that equity markets continue to progress. Within bond markets while increasing interest rates will be negative in capital terms, if these interest rate increases are moderate and implemented patiently then there still remains scope for positive returns from bonds given their income element. So the outlook for investors is expected to continue with the positive feel that has been cemented during 2017. This significant positive investor sentiment is clearly evident in markets at the start of 2018 as investors are gaining in optimism and confidence. In the end this will bring markets down, once this has been overdone, but for now this is likely to provide support to markets.

SANLAM INSTITUTIONAL BALANCED FUND (CONTINUED)

Fund Outlook *(continued)*

There remain a number of other risks to the global economy, these include: a significant slowdown in China, which has so far been averted; political events, such as the Italian election, and Merkel's ability to form a government in Germany; there is also a potential for international trade wars, especially with Trump's America First mantra; and as the recent US government shutdown indicates there are also other factors out there, that could start off small but grow into material threats. This all said we think that the market will continue to focus on the upturn in economic growth and the low inflation environment, and that markets can then continue to make progress.

Investment Manager

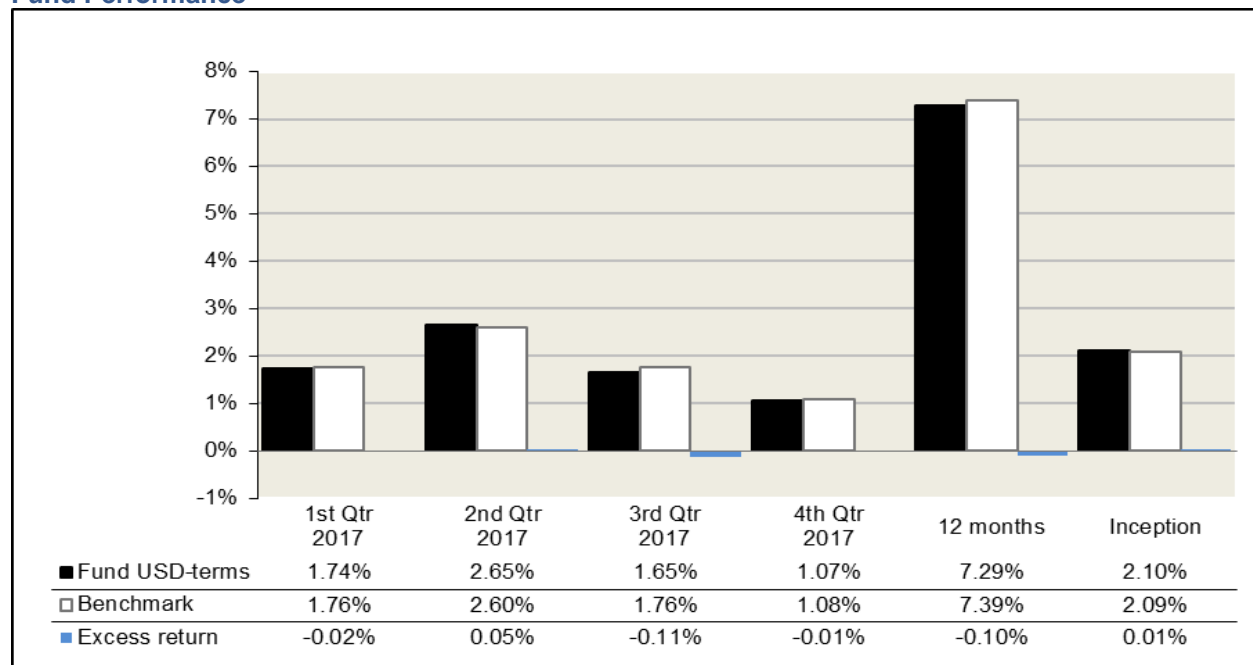

Sanlam Investment Management (Pty) Limited

SANLAM INSTITUTIONAL BOND FUND

Investment Objective

Sanlam Institutional Bond Fund (the “Fund”) aims to provide long-term capital growth by investing some or all of its assets in shares of the Sanlam Global Bond Fund, a sub fund of Sanlam Universal Funds Plc.

Fund Performance

Note: The Fund benchmark is the Barclays Capital Global Aggregate Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and AIFM fees.

The Fund had a relatively dull year in terms of relative performance, marginally underperforming the benchmark (Bloomberg Barclays Global Aggregate Bond Index) by -0.10%. It did, however, achieve 7.29% in absolute returns over the same period. The Fund had its strongest quarter in Q2, in which it gained 2.65% and +0.05% in absolute and relative returns respectively. It gave some of this outperformance back in Q3, where it underperformed by -0.11%. The Fund has outperformed its benchmark on an annualised basis since inception by +0.01%, having gained 2.10% in annualised absolute terms.

Fund Outlook

2017 saw the first major co-ordinated upturn in economic growth for a number of years, and this is set to continue into 2018. The major issue here is how long can this last for, and the extent to which this is cyclical. This upturn in economic growth would traditionally be associated with increases in inflation, but in this cycle, and economic cycles definitely still exist, inflation has remained subdued. The debate within markets, perhaps more indirectly than directly, is will inflation come through: how fast, to what extent, and where first; these are just a few of the related questions. With this economic backdrop the outlook for capital markets remains positive overall. Within bond markets while increasing interest rates will be negative in capital terms, if these interest rate increases are moderate and implemented patiently then there still remains scope for positive returns from bonds given their income element. So the outlook for investors is expected to continue with the positive feel that has been cemented during 2017. This significant positive investor sentiment is clearly evident in markets at the start of 2018 as investors are gaining in optimism and confidence. In the end this will bring markets down, once this has been overdone, but for now this is likely to provide support to markets. Indeed, developed sovereign bond markets remain expensive, especially when viewed in a historical context. Linked to this, corporate bond levels also look rich in terms of the absolute yield levels offered and the tightness of their spreads to sovereign bonds. Market participants are aware of these valuation issues and have generally chosen for now, not to ignore them, but to be cognisant of them, and to monitor them whilst still seeking to participate in markets.

SANLAM INSTITUTIONAL BOND FUND (CONTINUED)

Fund Outlook *(continued)*

There remain a number of other risks to the global economy, these include: a significant slowdown in China, which has so far been averted; political events, such as the Italian election, and Merkel's ability to form a government in Germany; there is also a potential for international trade wars, especially with Trump's America First mantra; and as the recent US government shutdown indicates there are also other factors out there, that could start off small but grow into material threats. This all said we think that the market will continue to focus on the upturn in economic growth and the low inflation environment, and that markets can then continue to make progress.

Investment Manager

Sanlam Investment Management (Pty) Limited

SANLAM GLOBAL FUND OF HEDGE FUNDS

Investment Objective

Sanlam Global Fund of Hedge Funds (the “Fund”) aims to generate moderate absolute returns with low volatility and little correlation to general equity and bond markets.

Fund Performance

Note: The Fund benchmark is a HFRI Fund of Funds Composite Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and AIFM fees.

The Fund finished 2017 up 5.7%, ahead of its benchmark by 1%. The performance was achieved with little dispersion from one quarter to another. The range in performance per quarter was between 1.04% and 1.74%. Dispersion at the investment manager level was greater, with three investments up by double digits (ThirdPoint, CityF ARF and Capricorn) and one down double digits. Cumulus, our energy investment continued to struggle and lost -13% on the year. While Cumulus managed to deliver their best performance during the end of the year, they remain on a watch list and will be reduced in size to manage the volatility in the strategy. Our core portfolio comprised of two low volatility multi strategy hedge funds, which constitute 35% of the portfolio finished the year up 5.6% and 7.1%. Not dazzling nor spectacular but the consistency in their return provided comfort in that they were not simply riding the ‘beta’ wave which was readily available. The Fund started the year with seven managers and ended the year with eight. Two new managers were added and one of these was redeemed within a short period of time. Instead of using strategy classifications to express portfolio exposures, we classify each investment based on one of three Risk Profiles; high volatility, low volatility and moderate volatility. The portfolio started the year with 60% exposure to high volatility managers, and this was reduced to 46% by the end of the year. Exposure to low volatility managers increased from 39% at the start of the year to 47% at end. Cash levels remained low for most of the year, averaging less than 2%.

Fund Outlook

2017 saw the first major co-ordinated upturn in economic growth for a number of years, and this is set to continue into 2018. The major issue here is how long can this last for, and the extent to which this is cyclical. This upturn in economic growth would traditionally be associated with increases in inflation, but in this cycle, and economic cycles definitely still exist, inflation has remained subdued. The debate within markets, perhaps more indirectly than directly, is will inflation come through: how fast, to what extent, and where first; these are just a few of the related questions. The overall positivity reflected above echoes that of markets at the start of 2018, but there remain significant challenges, risks and threats to global economic activity and capital markets.

SANLAM GLOBAL FUND OF HEDGE FUNDS (CONTINUED)**Fund Outlook** *(continued)*

Some of these risks have been identifiable for a significant period of time, and perhaps the most important of these is valuation levels. Today, developed sovereign bond markets remain expensive, especially when viewed in a historical context. Linked to this, corporate bond levels also look rich in terms of the absolute yield levels offered and the tightness of their spreads to sovereign bonds. Within equity markets price-earnings ratios are in most regions now at or above historical averages, and in places like the USA are definitely in the upper percentiles of their historical averages. Market participants are aware of these valuation issues and have generally chosen for now, not to ignore them, but to be cognisant of them, and to monitor them whilst still seeking to participate in markets. One of the reasons for this is that the alternative options look so unattractive – the protection cash offers investors is important, but until cash offers something materially positive the return arguments for holding cash are negligible. However, even now cash in the US has started to offer some return to investors, albeit from a very low starting point. There remain a number of other risks to the global economy, these include: a significant slowdown in China, which has so far been averted; political events, such as the Italian election, and Merkel's ability to form a government in Germany; there is also a potential for international trade wars, especially with Trump's America First mantra; and as the recent US government shutdown indicates there are also other factors out there, that could start off small but grow into material threats. This all said we think that the market will continue to focus on the upturn in economic growth and the low inflation environment, and that markets can then continue to make progress.

Investment Manager

Sanlam FOUR Investments UK Limited

SANLAM AFRICA EQUITY FUND

Investment Objective

The investment objective of Sanlam Africa Equity Fund (the “Fund”) is to provide long-term capital growth. There is no guarantee that the Fund will meet its investment objective.

Fund Performance

Note: The fund’s benchmark is 50/50 blend of the MSCI EFM Africa ex-SA Index and the S&P All Africa ex-SA Capped Index. Performance figures longer than 12 months are annualised. Figures are quoted gross of Investment Manager and AIFM fees.

The year 2017 turned out to be a good one for African equity markets after about three years of negative returns. The Sanlam Africa Equity Fund was up 51.16% in 2017 which was 30.81% ahead of the Fund’s benchmark. Since inception the Fund has outperformed the benchmark by 15.33%, annualised.

Our strong performance mostly came in the fourth quarter of the year. This was driven by writing-up our Fund’s Zimbabwean holdings which were previously discounted by 88% and we closed the year applying a 33% discount. Our two main holdings in Zimbabwe are Delta Beverages and Econet Wireless and all our positions in Zimbabwe represent 17% of the Fund.

The political situation in Zimbabwe has improved following the change in the Presidency, consequently our discount for Zimbabwe has narrowed sharply. The removal of Robert Mugabe from office was certainly a key highlight in the year. Zimbabwe has been waiting for a political change and this came through in November.

Fund Outlook

We think there is a reasonable chance of continued double digit earnings growth out of Egypt. Nigeria may also surprise with the first glimmers of an earnings rebound after a few tough years. Neither market strikes us as expensive if decent earnings growth comes through. While there is still much to worry about in Zimbabwe, the new president is talking a radically good game and if he delivers even partially, we may remain grateful for our exposure there. The USD and commodities continue to look broadly supportive to Africa and we have reasonable direct exposure here too. Finally, the outflows from African and Frontier funds that characterized the previous 2 - 3 years have reversed and any continuation of inflows would be supportive. Overall, barring some negative global event, Africa could still deliver decent returns to long term investors.

SANLAM AFRICA EQUITY FUND (CONTINUED)

Fund Outlook *(continued)*

On the flip side, African indices are getting closer to what we would consider fair multiples, though these tend to overshoot on the way up. Our Fund holdings do look better value than the indices though, and with good earnings growth potential. We would also caution that the last 18 months has been an exceptional period. African markets were coming off a very low base and clawed back some of that last year. A repeat of our 2017 returns would certainly surprise. In addition, we were faced with highly unusual FX environments through 2016 and '17. With a bit of luck as well as some sensible positioning, we were able to generate unusual amounts of alpha as FX markets normalised. We would be flat out gobsmacked if we even came close to repeating that.

Investment Manager

Sanlam Investment Management (Pty) Limited

**SANLAM GLOBAL INVESTMENT FUND
 SANLAM GLOBAL INVESTMENT FUND II
 SANLAM GLOBAL INVESTMENT FUND III
 SANLAM GLOBAL INVESTMENT FUND IV
 (COLLECTIVELY THE SANLAM GLOBAL INVESTMENT FUNDS)**

Investment Objective

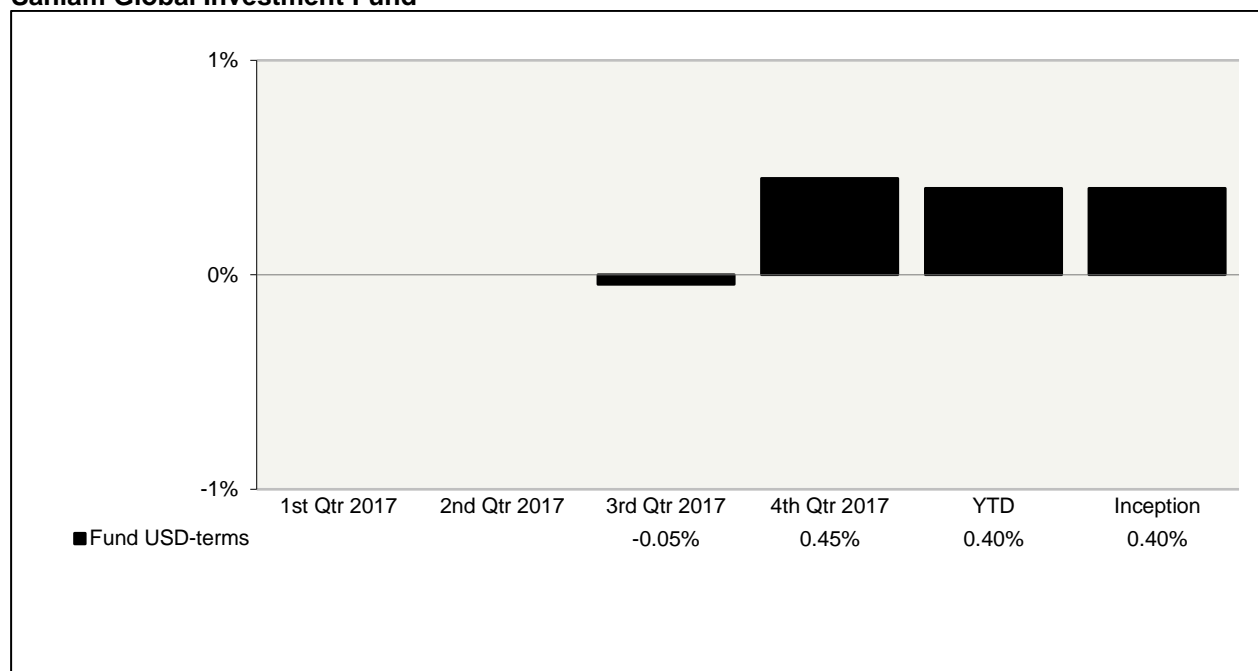

The Sanlam Global Investment Funds (“the Fund”) all have the same objective, to provide shareholders of the Fund with long-term capital growth. The Fund will use derivatives to provide the shareholders with the required equity exposure as well as limiting potential losses of capital. There are no guarantees that the Fund will meet its investment objective.

The Investment Manager intends to achieve the Fund’s investment objective by investing primarily in equity derivative instruments. The Fund may trade derivatives such as options (OTC), forwards, swaps and related indices. The Fund may also invest in money market instruments, equities or bonds across developed equity markets as required.

The Fund employs a buy and hold strategy.

Fund Performance

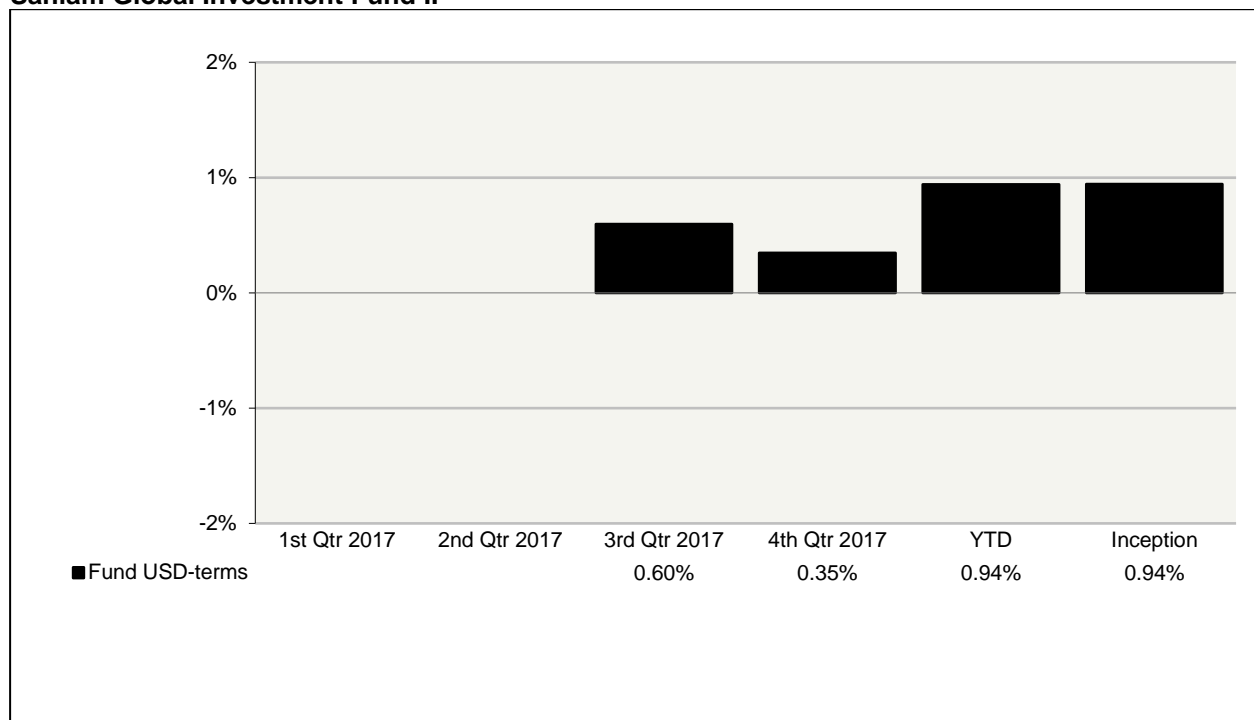

Sanlam Global Investment Fund

THE SANLAM GLOBAL INVESTMENT FUNDS (CONTINUED)

Fund Performance (continued)

Sanlam Global Investment Fund II

Sanlam Global Investment Fund III

THE SANLAM GLOBAL INVESTMENT FUNDS (CONTINUED)

Fund Performance (continued)

Sanlam Global Investment Fund IV

The Fund does not have a benchmark. Note: Performance figures longer than 12 months are annualised. Figures are quoted net of fees.

Fund Outlook

The Investment Manager currently has a positive view on European and UK equity markets relative to other developed market equity markets. World equity markets have appreciated strongly against the backdrop of low global yields and we remain cautious that this situation can reverse in the coming year as global yields rise on the back of inflationary pressure. However, we are of the view that the discrepancy in equity market valuations will remain for the foreseeable future and maintain a constructive view on Europe.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*for the year ended 31 December 2017***1. General – The Company**

Sanlam Qualifying Investors Funds Plc (the “Company”) is an investment company with variable capital and was incorporated on 11 September 2009 with registration number 475202 under the laws of Ireland and is “an existing investment company” within the meaning of Section 1394 of the Companies Act 2014 and is an investment company to which Part 24 applies. The Company is domiciled in Ireland.

The Company is authorised by the Central Bank of Ireland as a Qualifying Investor Alternative Investment Fund (“QIAIF”) in accordance with the Alternative Investment Fund Managers Directive (“AIFMD”). In accordance with the requirements of AIFMD, the Manager is the appointed Alternative Investment Fund Manager (“AIFM”).

At 31 December 2017, the Company comprised ten separate investment sub-funds (“Fund(s)”). The Articles of Association of the Company provides segregated liability between the various Funds. A list of Funds active during the period and their status at the year end is set out below:

Name	Status at 31 December 2017
Sanlam Institutional Equity Flexible Fund	Active
Sanlam Institutional Balanced Fund	Active
Sanlam Institutional Bond Fund	Active
Sanlam European Growth Basket Fund	Closed on 29 December 2017
Sanlam Global Fund of Hedge Funds	Active
Sanlam Africa Equity Fund	Active
Sanlam Global Investment Fund	Active – launched on 18 July 2017
Sanlam Global Investment Fund II	Active – launched on 1 September 2017
Sanlam Global Investment Fund III	Active – launched on 12 October 2017
Sanlam Global Investment Fund IV	Active – launched on 19 December 2017

Sanlam Global Investment Fund V was approved by the Central Bank of Ireland as an authorised designated sub-fund of the Company in 2018

Prices

There is a single price for buying, selling and switching Share classes in each Fund. This is represented by the Net Asset Value per Share class of the relevant Fund. In the case of subscriptions, a preliminary charge of up to 5% may be added to the Net Asset Value per Share class of all Funds. A conversion fee of up to 5% may be charged on applications to convert Shares of any class to Shares of another class. A repurchase fee of up to 3% may be deducted from the Net Asset Value per Share class of all Funds.

Dealing

The Dealing Day is, except where otherwise clarified in the Prospectus or Fund supplement (and with the exception of Sanlam Global Fund of Hedge Funds and Sanlam Africa Equity Fund), any day other than Saturday or Sunday on which banks are open for business in Dublin. The valuation point is, except where otherwise clarified in the Prospectus or Fund supplement, the close of business in each relevant market on the Business Day immediately preceding a Dealing Day.

For Sanlam Global Fund of Hedge Funds and Sanlam Africa Equity Fund, the Dealing Day is, except where otherwise clarified in the Prospectus or Fund supplement, the first business day of each month (a Business day being any day other than Saturday or Sunday on which banks are open for business in Dublin). The valuation point is, except where otherwise clarified in the Prospectus or Fund supplement, the close of business in each relevant market on the last Business Day of each month.

² The minimum subscription is the USD or ZAR equivalent of EUR amount disclosed.

There is no minimum additional investment amount required for the Share classes of the Funds. Only Qualifying Investors, as defined in the prospectus, may invest in the Funds.

2. Significant accounting policies

(a) Basis of preparation

The financial statements have been prepared in accordance with Irish Statute comprising the Companies Act 2014 under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss. The financial statements are prepared in US Dollars (“USD”) and on a going concern basis.

These financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union (“EU”) and interpretations adopted by the International Accounting Standard Board (“IASB”).

The principal accounting policies adopted in the preparation of the financial statements are set out overleaf.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies** *(continued)***(a) Basis of preparation** *(continued)*

All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating shares, unless otherwise stated.

The Statement of Financial Position presents assets and liabilities in decreasing order of liquidity and does not distinguish between current and non-current items.

(b) Significant accounting judgments and estimates

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the amounts recognised in the financial statements. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

Going Concern

The Company's management has made an assessment of the Company's ability to continue as a going concern and is satisfied that the Company will have the resources to continue in business for the foreseeable future. Furthermore, the management is not aware of any material uncertainties that may cast significant doubt upon the Company's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

Fair Value of Financial Instruments

When the fair value of financial assets and financial liabilities recorded in the Statement of Financial Position cannot be determined based on quoted prices in an active market, they are determined using an appropriate valuation technique. The valuation techniques employed by the Company and the judgements, estimates and assumptions associated with them are disclosed in note 2(d).

Investment Entity Status

The Company's management has determined that the Company has all of the typical characteristics of an investment entity as set out in IFRS 10.

(c) Income recognition

Interest income and expense are recognised in the Statement of Comprehensive Income for all debt instruments using the effective interest rate method.

Dividends are recognised as income on the dates the securities are first quoted "ex dividend" to the extent that information thereon is reasonably available to the relevant Fund. Bank deposit interest and other income are accounted for on an accruals basis. Income which is subject to a deduction of tax at source is shown gross of such withholding tax. Withholding tax recoverable is accounted for on receipts basis. Franked investment income (which comprises most of the UK source dividend income) is shown net of the notional tax credit.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies (continued)****(d) Investment transactions and valuations****(i) Classification**

In accordance with IAS 39, *Financial Instruments: Recognition and Measurement* ("IAS 39"), the Funds have classified all of their investments as financial assets and liabilities at fair value through profit or loss. The categories of financial assets and financial liabilities at fair value through profit or loss comprise:

- Financial assets or financial liabilities held for trading: these are instruments which are either acquired for generating a profit from short term fluctuations in price or dealer margins, or are included in a portfolio where a pattern of short term trading exists. Under IAS 39, derivatives and short positions are always classified as held for trading. All derivatives in a net receivable position (positive fair value) are reported as financial assets. All derivatives in a net payable position (negative fair value) are reported as financial liabilities.
- Financial assets or financial liabilities designated at fair value through profit or loss upon initial recognition: Financial assets are designated at fair value through profit or loss upon initial recognition if the investments are managed and purchase and sale decisions are made based on their fair value in accordance with the Funds' documented risk management or investment strategy.

At 31 December 2017 and 31 December 2016, the Funds classified their investments as held for trading. All other financial assets are classified as loans and receivables and are carried at amortized cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities that are not held for trading comprise balances due to brokers and all other liabilities. These are carried at amortized cost using the effective interest rate method.

(ii) Recognition

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument.

A regular way purchase of financial assets is recognised using trade date accounting. From this date any gains or losses arising from changes in the fair value of the financial assets or financial liabilities are recorded in profit or loss in the Statement of Comprehensive Income.

Financial liabilities are not recognised unless one of the parties has performed its obligations or the contract is a derivative contract not exempted from the scope of IAS 39.

(iii) Measurement and fair value measurement principles***Initial measurement***

Financial instruments are measured initially at fair value (transaction price) plus, in the case of financial assets or financial liabilities not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial assets or financial liabilities.

Transaction costs on financial assets or financial liabilities at fair value through profit or loss are expensed immediately while on other financial instruments they are amortised.

Subsequent measurement

Subsequent to initial recognition, financial assets and financial liabilities at fair value through profit or loss are measured at fair value, with changes in their fair value recognised as gains or losses in the statement of comprehensive income in the period in which they arise.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies** *(continued)***(d) Investment transactions and valuations** *(continued)***(iii) Measurement and fair value measurement principles** *(continued)***Subsequent measurement** *(continued)*

Loans and receivables are measured at amortised cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities that are not at fair value through profit or loss are measured at amortised cost using the effective interest rate method.

Financial liabilities arising from the redeemable shares issued by the Funds are carried at the redemption amount representing the investor's right to a residual interest in the Funds' assets.

Fair value measurement principles

In accordance with IFRS 13, *Fair value measurement* ("IFRS 13"), the fair value of financial assets and financial liabilities traded in active markets (such as publicly traded derivatives, trading securities and exchange-traded funds) are based on the last reported sales price at the close of trading on the reporting date, if the last reported sales price falls within the bid-ask spread. However, if the last reported sales price falls outside the bid-ask spread, Management will determine the point within the bid-ask spread that is most representative of fair value.

Assets not listed, or traded on any stock exchange or over-the-counter ("OTC") market, are valued at their fair value as determined with care and in good faith by the AIFM in consultation with the relevant Investment Manager.

Collective investment schemes – investments in open-ended collective investment schemes are valued at the latest available unaudited net asset value. Closed-ended schemes which are traded as liquid schemes are valued at bid price at the year-end or if unavailable, a mid-quotation from a broker or, if unavailable or unrepresentative, the latest available unaudited net asset value as deemed relevant to the collective investment scheme.

Certain investments within the portfolio of Sanlam Global Fund of Hedge Fund have been deemed by the AIFM to be illiquid and not currently capable of being traded at fair market value. Such investments have been allocated to a side pocket represented by the Designated Class A Shares of the Fund. The value of the collective investment schemes allocated to side pockets is adjusted as appropriate by the AIFM. This determination reflects the lack of liquidity. The determination by the AIFM is based on the AIFM's best estimate of the fair value of such assets determined in good faith using information derived from the respective fund administrators.

Derivative instruments – exchange-traded derivative instruments are valued at the settlement price for such instruments as determined on the specific market. If such a price is not available the fair value shall be the probable realisation value estimated by the AIFM, consulting where appropriate with the Investment Manager.

OTC derivative instruments are valued at the settlement price as provided by the counterparty and verified by the AIFM on a monthly basis, or by a competent person appointed by the AIFM and approved for such a purpose by the Depositary. Such competent person may be the relevant Investment Manager provided that he is independent of the counterparty.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies** *(continued)***(d) Investment transactions and valuations** *(continued)***(iv) Derecognition**

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition in accordance with IAS 39. A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or expired.

The Company uses the first-in-first-out (“FIFO”) method to determine realised gains and losses on derecognition. Realised gains and losses on derecognition are included in the Statement of Comprehensive Income.

(v) Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and liability simultaneously.

(e) Foreign currency translation**Functional and presentation currency**

Items included in each Fund’s individual financial statements are measured using the currency of the primary economic environment in which it operates (‘the functional currency’).

US Dollar (“USD”) is the functional currency of Sanlam Institutional Equity Flexible Fund, Sanlam Institutional Balanced Fund, Sanlam Institutional Bond Fund, Sanlam Global Fund of Hedge Funds and Sanlam Africa Equity Fund.

South African Rand (“ZAR”) is the functional currency of Sanlam Global Investment Fund, Sanlam Global Investment Fund II, Sanlam Global Investment Fund III and Sanlam Global Investment Fund IV.

The Company has adopted USD as its presentation currency.

Where necessary, each Fund’s financial position is translated from its functional currency to the presentation currency, as follows:

- Assets and liabilities, including net assets attributable to holders of redeemable participating shares, are translated at the closing rate at each statement of financial position date. Exchange differences arising between the rate of translation of subscriptions, redemptions and the net assets attributable to the holders of redeemable participating shares; and
- Income and expenses for each Statement of Comprehensive Income are translated at average exchange rates.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Proceeds from subscriptions and amounts paid on redemption of redeemable participating shares are translated at monthly average rates, which approximate the rates prevailing at the dates of the transactions. Translation differences on non-monetary items, such as equities, held at fair value through profit and loss are reported as part of their fair value gain or loss.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies (continued)****(f) Cash and cash equivalents**

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts, which are included within liabilities.

The Company has adopted the Fund Asset Model in compliance with the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) Investor Money Regulations 2015 for Fund Service Providers (“the Investor Money Regulations”). Accordingly, the Company has established subscription, redemption and dividend cash accounts, at umbrella level, which are held in the name of the Company (the “Umbrella Cash Accounts”). All subscriptions, redemptions or dividends payable to or from the relevant Fund will be channelled and managed through such Umbrella Cash Accounts and no such accounts operate at the level of each individual Fund. However the Company ensures that the amounts within an Umbrella Cash Account, whether positive or negative, can be attributed to the relevant Fund in order to comply with the requirement that the assets and liabilities of each Fund are kept separate from all other Funds and that separate books and records are maintained for each Fund in which all transactions relevant to a Fund are recorded.

(g) Distribution policy

The Directors have no current intention to make distributions from any Fund. All such profits shall be retained in the relevant Fund.

(h) Consolidation

The Company has determined that it is an investment entity in accordance with IFRS 10, Consolidated Financial Statements and Investment Entities Amendments to IFRS 10, IFRS 12 and IAS 27. As an investment entity, the Company is required to account for its investment in subsidiaries, if any, at fair value through profit or loss. The Company does not present consolidated financial statements since it is required to measure all of its subsidiaries at fair value through profit or loss.

(i) Changes in accounting policy and disclosures**Standards and amendments to existing standards effective 1 January 2017**

There were no new standards and/or amendments to existing standards effective 1 January 2017, that were of significance to the Company.

(j) Standards, interpretations and amendments to published standards that are not yet effective

The following new standards, amendments to standards and interpretations have been issued to date and are not yet effective for these financial statements of the Company for the period ended 31 December 2017, and have not been applied nor early adopted in preparing these financial statements:

Standard:	Narrative:	Effective date:
IFRS 9	Financial Instruments: Classification and Measurement	1 January 2018
IFRS 15	Revenue from Contracts with Customers	1 January 2018
IFRS 2	Classification and Measurement of Share-based Payments	1 January 2018
IFRS 16	Leases	1 January 2019
IFRS 10/IAS 28	Sale or contribution of asset between an investor and its Associate or Joint Venture (Amendment)	Not specified

**Annual periods beginning on or after.*

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***2. Significant accounting policies** *(continued)***(j) Standards, interpretations and amendments to published standards that are not yet effective**
(continued)

IAS 8, *Accounting Policies, Change in Accounting Estimates and Errors* ("IAS 8"), states that financial statements disclose either:

- (i) a discussion of the impact that initial application of the IFRS is expected to have on the entity's financial statements; or
- (ii) if that impact is not known or reasonably estimable, a statement to that effect.

Other than as set out below, the Directors anticipate that the adoption of new standards, interpretations and amendments that were in issue at the date of authorisation of these financial statements, but not yet effective, will have no material impact on the financial statements in the year of initial application.

IFRS 9, Financial Instruments: Classification and Measurement ("IFRS 9")

IFRS 9, issued on 24 July 2014 is the IASB's replacement of IAS 39. IFRS 9 includes requirements for recognition and measurement, impairment, derecognition and general hedge accounting.

The IASB completed its project to replace IAS 39 in phases, adding to the standard in each phase. The complete standard issued on 24 July 2014 includes requirements previously issued and additional amendments to incorporate a new expected loss impairment model and to introduce limited amendments to the classification and measurement requirements for financial assets. This version of IFRS 9 supersedes all previous versions and is mandatorily effective for periods beginning on or after 1 January 2018 with early adoption permitted (subject to local endorsement requirements).

IFRS 9 uses business models and contractual cash flow characteristics to determine whether a financial asset is measured at amortised cost, fair value through profit or loss or fair value through other comprehensive income, replacing the four category classification in IAS 39. The approach is also based on how an entity manages its financial instruments (its business model) and the contractual cash flow characteristics of the financial assets. Most of the requirements for financial liabilities were carried forward unchanged from IAS 39. However, some changes were made to the fair value option for financial liabilities to address the issue of own credit risk.

IFRS 9 introduces a substantially-reformed model for hedge accounting with enhanced disclosures about risk management activity.

As part of IFRS 9, the IASB has introduced a new, expected loss impairment model that will require more timely recognition of expected credit losses. Specifically, the new standard requires entities to account for expected credit losses from when financial instruments are first recognised and it lowers the threshold for recognition of full lifetime expected losses.

Based on an initial assessment, IFRS 9 is not expected to have a significant impact on the financial statements of the Company as financial instruments that are currently measured at fair value through profit or loss will continue to be measured at fair value through profit or loss under IFRS 9. Similarly, those financial instruments currently measured at amortised cost will continue to be measured at amortised cost under IFRS 9. Application of the new standard may result in additional disclosure in the financial statements.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***3. Taxation**

The Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. It is not chargeable to Irish tax on its income or gains. Tax may arise on the happening of a chargeable event. A chargeable event includes any distribution payments to shareholders or any other encashment, redemption or transfer of shares. No tax will arise on the Company in respect of chargeable events in respect of:

- A shareholder who is not an Irish resident and not ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided the necessary signed statutory declarations are held by the Company; and
- Certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations.

Following legislative changes in the Finance Act 2006, the holding of shares at the end of a Relevant Period will, in respect of Irish Resident investors, also constitute a chargeable event. To the extent that any tax issues arise on such a chargeable event, such tax will be allowed as a credit against any tax payable on the subsequent encashment, redemption, cancellation of the relevant Shares.

Relevant Period is defined as a period of 8 years, beginning with the acquisition of a Share by a shareholder and each subsequent period of 8 years beginning immediately after the preceding Relevant Period.

Dividend income, interest and capital gains received by the Company may be subject to non-recoverable withholding tax in the countries of origin.

4. Share capital**Authorised Share Capital**

The authorised share capital of the Company is 1,000,000,000,000 shares of no par value.

Subscriber Shares

The equity share capital of the Company is EUR 5 represented by Subscriber Shares issued for the purposes of incorporation of the Company. These Subscriber Shares are beneficially owned by the Manager. The Manager is an ultimate subsidiary of Sanlam Limited. The holder or holders of Subscriber Shares are entitled to one vote only in respect of all Subscriber Shares. The Subscriber Shares do not form part of Shareholders' Funds. They are thus disclosed in the financial statements by way of this note only. In the opinion of the Directors, this disclosure reflects the nature of the Company's business as an investment fund.

Redeemable Participating Shares

Each Fund may issue one or more classes of Shares, and each class of Shares in a Fund may have different charging structures and different minimum initial investment amounts, minimum additional investment amounts and minimum shareholding requirements. Each class of Shares has a distinct fee structure as outlined in note 12.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS

Sanlam Global Investment Fund IV	-	-	✓	-	-	-	-

¹ Sanlam Global Fund of Hedge Funds Designated Class A Shares are operated as a side pocket class which holds Designated Investments. The shares were issued to the holders of the Class A shares and have restricted redemption terms.

The redeemable participating shares are redeemable at the shareholders option and are classified as financial liabilities. They carry voting rights. The participating shares can be put back to the Company at any time for cash equal to a proportionate share of the Company's net asset value. The participating share is carried at the redemption amount that is payable at the statement of financial position date if the shareholder exercises its right to put the share back to the Company.

The Shares issued by the Company are freely transferable and entitled to participate equally in the profits and dividends of the Company and in its net assets upon liquidation. The Shares, which are of no par value, carry no preferential or pre-emptive rights and are entitled to one vote each at all meetings of the relevant class of Shareholders. All Shares rank pari-passu.

8. Fair value of financial instruments

The AIFM is responsible for ensuring that proper and independent valuation of the assets of the Company can be performed. The financial instruments held by each Fund are valued in accordance with the valuation policy of the AIFM.

The following table shows financial instruments recognised at fair value. The fair value hierarchy shall have the following levels:

- Quoted prices in active markets for identical assets or liabilities (level 1);
- Inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (level 2); and
- Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3).

The inputs or methodology used for valuing securities are not necessarily an indication of the risks associated with investing in those securities.

	USD	USD	USD	USD
Forwards contracts	-	(251,167)	-	(251,167)
Total financial liabilities at fair value through profit or loss	-	(251,167)	-	(251,167)

No Funds held financial liabilities measured at fair value through profit or loss at 31 December 2016.

Investments whose values are based on quoted market prices in active markets, and therefore classified within level 1, include active listed equities, exchange traded funds and collective investment schemes. The AIFM does not adjust the quoted price for these instruments nor does it apply a discount to securities where the volume traded in the market is low relative to the Fund's holding.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within level 2. These include, collective investment schemes, equity linked notes and over-the-counter derivatives such as options, warrants and forwards. As level 2 investments include positions that are not traded in active markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability, which are generally based on available market information.

Level 3 investments

Valuation process

The portfolio of Sanlam Global Fund of Hedge Funds includes investments in collective investment schemes which are not quoted in an active market and which may be subject to restrictions on redemptions such as lock up periods, redemption gates and side pockets. Transactions in the shares of such collective investment schemes do not occur on a regular basis. Investments in those collective investment schemes are valued based on the NAV per share published by the administrator of those collective investment schemes. Such a NAV is adjusted when necessary, to reflect the effect of the time passed since the calculation date, liquidity risk, limitations on redemptions and other factors. Depending on the fair value level of an underlying fund's assets and liabilities and on the adjustments needed to the NAV per share published by that collective investment schemes, the AIFM classifies the fair value of that investment as either level 2 or level 3.

Where an adjustment has been made to the NAV as provided to account for liquidity concerns e.g. redemption restrictions, side pockets etc., the investments in these collective investment schemes are included in level 3 of the fair value hierarchy, since the adjustments are partly based on unobservable inputs. At 31 December 2017 and 31 December 2016, adjustments were made to the NAVs provided for certain funds and such investments were categorised within level 3 of the fair value hierarchy.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS

(CONTINUED)

for the year ended 31 December 2017

8. Fair value of financial instruments *(continued)*

Level 3 investments *(continued)*

Valuation process (continued)

The level 3 valuations of the Designated Class A collective investment schemes are reviewed on a quarterly basis by the AIFM, which reports to the Board of Directors and all other relevant parties on a regular basis. In selecting the most appropriate valuation model, the AIFM considers the most recent unaudited NAV per share obtained from the underlying administrator. The AIFM also considers liquidity and other factors such as distributions received and secondary market sales. Each investment is individually reviewed on a quarterly basis.

Reconciliation

The following tables show a reconciliation of all movements in the fair value of financial instruments categorised within level 3 between 1 January and 31 December in 2017 and 31 December 2016:

Sanlam Global Fund of Hedge Funds		
	Investment in collective investment schemes	
	2017	2016
Balance as at 1 January	243,926	231,660
Realised gains	(767,933)	3,458
Change in unrealised gains/(losses)	830,191	58,221
Gross Purchases	-	-
Gross Sales	(3,463)	(49,413)
Transfers in and out of level 3	-	-
Balance as at 31 December	302,721	243,926
Total unrealised gains/(losses) for the year included in profit or loss for level 3 assets held at year end	830,191	58,221

Quantitative information of significant unobservable inputs - level 3

The following tables disclose the quantitative information regarding the significant unobservable inputs used in measuring the Fund's financial instruments, categorised as level 3 in the fair value hierarchy as at 31 December 2017:

Description	2017 USD	Valuation technique	Unobservable Input
Collective investment schemes	302,721	Adjusted NAV	0%-100% discount for lack of liquidity

The following tables disclose the quantitative information regarding the significant unobservable inputs used in measuring the Fund's financial instruments, categorised as level 3 in the fair value hierarchy as at 31 December 2016:

Description	2016 USD	Valuation technique	Unobservable Input
Collective investment schemes	243,926	Adjusted NAV	0%-100% discount for lack of liquidity

*These collective investment schemes were included in level 3 of the fair value hierarchy as they were subject to lock-ups, gates or suspended redemptions. These investment funds were priced in line with the valuation policy for level 2 investments and were not adjusted using a valuation technique.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***8. Fair value of financial instruments (continued)****Level 3 investments (continued)***Sensitivity analysis to significant changes in unobservable inputs within level 3 hierarchy*

The significant unobservable inputs used in the fair value measurements categorised within level 3 of the fair value hierarchy together with a quantitative sensitivity analysis as at 31 December 2017 and 31 December 2016 are shown below:

31 December 2017:

Description	Input	Sensitivity used	Effect on fair value in USD
Collective investment schemes	Discount for lack of liquidity	5% increase	15,136
Collective investment schemes	Discount for lack of liquidity	5% decrease	(15,136)

31 December 2016:

Description	Input	Sensitivity used	Effect on fair value in USD
Collective investment schemes	Discount for lack of liquidity	5% increase	12,196
Collective investment schemes	Discount for lack of liquidity	5% decrease	(12,196)

Significant increases/(decreases) in the discount in isolation would result in a significantly (lower)/higher fair value measurement.

Investments classified within level 3 have significant unobservable inputs, as they trade infrequently.

Significant transfers between levels

There were no significant transfers between levels in the years ended 31 December 2017 or 31 December 2016.

9. Assets and liabilities not carried at fair value but for which fair value is disclosed

For all non-financial assets and liabilities at fair value through profit and loss, their carrying values are a reasonable approximation of fair value.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS

(CONTINUED)

for the year ended 31 December 2017

10. Offsetting of financial assets and liabilities

IFRS 7 requires an entity to disclose information to enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on the entity's financial position.

At 31 December 2017, 1 Fund (2016: no Funds) held derivative financial instruments that were subject to an enforceable master netting arrangement or similar agreement.

The tables on the following pages provide information on the financial impact of netting for instruments subject to an enforceable master netting arrangement or similar agreement at 31 December 2017.

Directors' interests

The Directors had no interest in the shares of the Company or Funds at 31 December 2017 or at any time during the financial year.

Significant Agreements

Manager

Pursuant to the Amended and Restated Management and Administration Agreement effective 29 August 2014, SAMI acts as both Manager and Administrator to the Company. SAMI is an ultimate subsidiary Company of Sanlam Limited.

The Manager is entitled to receive an AIFM fee (an annual fee of the percentages listed below per share class). These fees are payable monthly in arrears and accrued by reference to the net assets of the share class on a daily basis. The Manager will pay, out of the AIFM fee, the fees of the Investment Manager and, where applicable, the fees of the Investment Allocation Manager and Investment Advisors also.

AFM fees earned by the Manager during the year and outstanding accrued fees as at 31 December 2017 and 31 December 2016 are disclosed on pages 99 to 101.

Administrator

SAMI, as the Administrator, is a related party of the Company. In its role as the Administrator SAMI is entitled to receive out of the assets of each Fund an annual fee ranging from 0.025% – 0.08% of the net assets of the Fund, plus an annual fee up to a maximum of USD 15,000 per annum. In addition, the Administrator is entitled to receive its reasonable costs and expenses incurred in the performance of its duties as Administrator of the Company. These fees shall accrue and be calculated on each dealing day and shall be payable monthly in arrears. The fees earned by the Administrator during the period and outstanding accrued fees as at 31 December 2017 are presented in the statement of comprehensive income and statement of financial position respectively.

Investment Managers and Investment Allocation Manager

The Investment Managers, Sanlam Investment Management (Pty) Limited and Sanlam FOUR Investments UK Limited, are appointed and paid by the Manager. Both Investment Managers are related parties to the Company and the Manager. Sanlam FOUR Investments UK Limited is also the appointed Investment Allocation Manager for the Funds.

Performance Fee

For certain share classes of Sanlam Africa Equity Fund, the Investment Manager is entitled to receive out of the assets of the Funds a performance fee in respect of each performance period.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***12. Related party transactions and significant agreements** *(continued)***Significant Agreements** *(continued)***Performance Fee** *(continued)*

The performance period comprises each successive twelve month period from 1 January to 31 December. Performance fees are calculated as follows:

- (a) The performance fee shall be equal to 15% of the difference between the percentage movement in the Net Asset Value per Share (A) being the Initial Issue Price for the first performance period and the percentage movement in the relevant index as set out in the prospectus (the "Index") (B) during the performance period multiplied by the average of the Net Asset Value of the Fund as at each Valuation Point during the performance period prior to any accrual for performance fees but after accruing for all other fees and expenses.
- (b) Where the Fund has underperformed the Index during a performance period (where A-B is a negative number), the Investment Manager will not repay any amounts of performance fee paid by the Fund in respect of previous performance periods but no further performance fees will be charged until such time as any underperformance is recaptured by the Fund (until A-B measured since the end of the last performance period in respect of which a performance fee was paid becomes positive).
- (c) For the performance period in which any underperformance is first recaptured, the performance fee will be calculated in accordance with paragraph (b) above, except that the performance fee will only take into account any subsequent outperformance (A-B will be measured since the end of the last performance period in respect of which a performance fee was paid). Performance fee calculations in subsequent performance periods will revert to being based on the performance over the relevant performance period as calculated in accordance with paragraph (a) above.
- (d) The performance fee shall be calculated by the Administrator (subject to verification by the Depositary) and accrued in the Net Asset Value calculated in respect of each Dealing Day based on the performance to date of the Fund during that performance period.

Net realised and unrealised capital gains plus net realised and unrealised capital losses as of the relevant Valuation Point shall be taken into account in calculating the Net Asset Value per Share. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised.

Depositary

Brown Brothers Harriman Trustee Services (Ireland) Limited is the appointed Depositary to the Funds. The Depositary is not a related party to the Company.

The Depositary is entitled to receive out of the assets of each Fund an annual fee ranging from 0.005% – 0.03% of the net assets of the Funds (plus VAT, if any) together with reasonable costs and expenses incurred by the Depositary in the performance of its duties as Depositary of the Fund. These fees are accrued and calculated on each dealing day and are payable monthly in arrears. The Depositary is also entitled to be reimbursed out of the assets of the Fund all agreed safekeeping fees, expenses and transaction charges (which are charged at normal commercial rates).

Securities lending

Effective from 24 February 2016, pursuant to the Securities Lending Agency Agreement, SAMI was appointed as securities lending agent to the Company. Prior to the appointment of SAMI, Brown Brothers Harriman & Co acted as securities lending agent to the Company.

Significant Agreements *(continued)*

Securities lending *(continued)*

Pursuant to the Securities Lending Sub-Agency Agreement, effective 24 February 2016 Brown Brothers Harriman & Co. was appointed by SAMI as securities lending sub-agent to the Company.

The securities lending agent and securities lending sub-agent receive remuneration for their services provided as part of the Company's securities lending arrangements, the terms of which are set out in the agreements referenced above. Pursuant to the Securities Lending Agency Agreement, income from stock lending activities is split in the ratio of 70:30 in favour of the Company, with SAMI receiving 30% as remuneration for their services.

For the year ended 31 December 2017, SAMI received USD 168,079 (2016: USD 10,140) with respect to the securities lending activity of Sanlam Institutional Balanced Fund and the Sanlam Africa Equity Fund.

Further details on the Company's securities lending activity are disclosed in note 17.

Registrar and Transfer Agent

Brown Brothers Harriman Fund Administration Services (Ireland) Limited is the appointed Registrar and Transfer Agent to the Company. Transfer agency fees are charged at normal commercial rates. The Registrar and Transfer Agent is not a related party of the Company.

Cross Investments

No Fund held any investments in other Funds within the Company at 31 December 2017 or 31 December 2016.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***13. Efficient portfolio management and transactions in Financial Derivative Instruments**

The Company on behalf of a Fund may employ techniques and instruments relating to transferable securities and/or other financial instruments in which it invests for efficient portfolio management purposes. Use of such techniques and instruments should be in line with the best interests of Shareholders and will generally be made for one or more of the following reasons:

- (a) the reduction of risk;
- (b) the reduction of cost; or
- (c) the generation of additional capital or income for the relevant Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules.

The Funds may engage in transactions in Financial Derivative Instruments (“FDIs”) for the purposes of efficient portfolio management. FDIs may also be used by a Fund to meet its investment objective, for risk reduction and implementation of investment policies.

The Funds may enter into forward foreign currency contracts for efficient portfolio management purposes. Forward foreign currency exchange contracts are used to hedge against anticipated future changes in exchange rates which otherwise might either adversely affect the value of the Fund’s portfolio securities or adversely affect the price of securities which the Funds intend to purchase at a later date.

The Funds may also enter into futures contracts for efficient portfolio management purposes. The primary purpose for which the Funds use futures contracts are cash equalisation, hedging and return enhancement. The purpose of cash equalisation is to expose uninvested cash within the Funds to equity market-like returns and ensure that the Funds’ liquid assets are utilised as though invested in the markets.

Interest rate swaps are used for hedging against adverse movements in interest rates. Options offer the ability, when used as a hedging tool to be utilised in efficient portfolio management, to provide offsetting insurance of asset value in an uncertain or highly volatile market environment. The Funds, where permitted, may use options to hedge or achieve exposure to a particular currency.

By purchasing certain instruments, the Funds may more effectively achieve the desired portfolio characteristics that assist the Funds in meeting their investment objectives.

The Funds also engage in securities lending activities for efficient portfolio management purposes, details of which are set out in note 17. Disclosures in accordance with the EU Securities Financing Transactions Regulation (“SFTR”) are set out in the unaudited schedules attached to these financial statements.

At 31 December 2017, the Sanlam Global Fund of Hedge Funds holds derivative financial instruments, namely forward foreign currency contracts. The Fund invests in forward foreign exchange contracts to hedge against anticipated future changes in exchange rates.

Forward foreign currency contracts

Forward foreign currency contracts are commitments to either purchase or sell a currency at a future date for a specified price and may be settled in cash or another financial asset. Forward foreign currency contracts are individually traded over-the-counter contracts. Forward foreign currency contracts result in credit exposure to the counterparty. Where a Fund utilises Forward foreign currency contracts which alter the currency exposure characteristics of transferable securities held by that Fund, the performance of that Fund may be strongly influenced by movements in foreign exchange rates because currency positions held by the Fund may not correspond with the securities positions held. Changes in the value of open forward foreign currency contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***13. Efficient portfolio management and transactions in Financial Derivative Instruments***(continued)*

At 31 December 2016, the Sanlam European Growth Basket Funds held derivative financial instruments, namely option contracts. The Fund invests in option contracts to gain exposure to European equity indices.

Option contracts

Put options are contracts sold for a premium that gives one party (the buyer) the right, but not the obligation, to sell to the other party (the seller) of the contract, a currency at a specified rate. Call options are similar contracts sold for a premium that gives the buyer the right, but not the obligation, to buy from the seller of the option. A Fund, where permitted to use options, may be a seller or buyer of put and call options. Options are liquid and traded efficiently. Changes in the value of open options contracts are recognised as unrealised gains or losses in the Statement of Comprehensive Income until the contracts are terminated, at which time realised gains and losses are recognised. All open option positions as at 31 December 2016 are covered and are not used for the purposes of obtaining leverage.

Details of the open derivative financial instruments at the reporting date are included in the Portfolio of Investments for the Fund.

14. Soft commissions

The Funds did not enter into any soft commission arrangements during the year ended 31 December 2017 or the year ended 31 December 2016.

15. Portfolio changes

A list of portfolio changes during the year is available, free of charge, from the Administrator.

for the year ended 31 December 2017

17. Securities lending activities

Securities lending activities are conducted through SAMI and Brown Brothers Harriman & Co pursuant to the Securities Lending Agency Agreement and Securities Lending Sub-Agency Agreement dated 24 February 2016.

In this arrangement, the Company transfers securities to a counterparty, in return for which it is agreed that securities of the same kind and amount should be transferred back to the Company at a later date. The arrangement has the substance of a loan of the Company's securities in return for collateral. The collateral held is in a form required by the Central Bank of Ireland.

Aggregate income arising from securities lending activities consists of fees charged to a counterparty, where the counterparty has provided collateral other than cash, plus net realised income derived from investments of cash collateral less any rebate payable to a counterparty on cash collateral less any commissions or similar transactions costs.

The Funds received income as follows under the terms of those agreements for the year ended 31 December 2017:

	Sanlam Institutional Balanced Fund
	USD
Income	162,651

Collateral %	105%

18. Risk arising from financial instruments

The Funds' investment portfolios are comprised of quoted and non-quoted equity, equity linked notes, derivative instruments and investments in underlying funds.

The Company's investing activities expose it to various types of risks that are associated with the financial investments and markets in which it and its Funds invest. The AIFM has a documented risk management policy comprising such procedures as are necessary to enable the AIFM to assess for each Fund the exposure to relevant risks. The significant types of financial risks which the Company and its sub-funds are exposed to are market risk, liquidity risk and counterparty credit risk. Information on other additional risks, which would not be assessed as significant to the Funds, is also set out below.

The AIFM has delegated discretionary portfolio management functions to the Investment Allocation Manager or Investment Manager appointed to each Fund (as applicable). The Investment Allocation Manager or Investment Manager (as applicable) manages the asset allocations in order to achieve the investment objectives. Divergence from target asset allocations and the composition of the portfolio is monitored by the Investment Allocation Manager/Investment Manager.

An Investment Manager is approved for each Fund subject to such Investment Manager meeting the delegation criteria as set out in the AIFM's Outsourcing Policy (which incorporates the requirements of Articles 75 - 82 of AIFMD Level 2). The AIFM will exercise due skill, care and diligence in the selection of and the entering into, managing or terminating of any delegation arrangement with an Investment Manager appointed to a Fund of the Company. The Investment Manager is provided with an Investment Management Agreement which includes a detailed set of guidelines (for single Investment Manager Funds) regarding the parameters within which a Fund must be managed. These guidelines will include items such as maximum exposure to a single issuer, tracking error limits and the relevant AIF Rulebook Requirements. Each Investment Manager is required to report to SAMI on a monthly basis that they have managed the portfolio in accordance with the Investment Management Agreement and Guidelines and that no breaches occurred during the month.

If, during the course of the month, the Investment Manager does detect an active breach, they must notify SAMI immediately with the details of the breach, its cause, the impact on the Fund/Portfolio and their proposed action to resolve the breach.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***18. Risk arising from financial instruments (continued)**

SAMI will engage with the relevant Investment Manager and/or the Investment Allocation Manager, to determine what action should be taken (this can include putting the Fund back to the position it would have been in if the breach had not taken place). The Depositary will also be consulted to ensure they are in agreement with the proposed remedy.

Each Investment Manager appointed by SAMI will have its own risk management policies and procedures in place, which may differ from Investment Manager to Investment Manager, and these will be considered by SAMI at the time of assessing the Investment Manager and in regular periodic assessments of the Investment Manager. A variety of methods used to monitor market risk are described below.

Investment reports, detailing the performance of the Funds are considered by the Board of Directors of the AIFM and of the Company on a quarterly basis.

(i) Market Risk

The potential for changes in the fair value or cash flows of the Fund's investment is referred to as market risk. Categories of market risk include currency risk, interest rate risk and other price risk.

The Company's market risk strategy is driven by the investment objectives of each of the Company's Funds. The AIFM has instructed each Investment Manager and/or the Investment Allocation Manager to manage each of the risks in accordance with policies and procedures in place.

(a) Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Currency risks may result from exposures to changes in spot prices, forward prices and volatilities of currency rates.

The Funds may invest in financial investments and enter into transactions denominated in currencies other than their functional currency. The Funds are also exposed to the currency risk of the underlying funds in which they invest. Consequently, the Funds may be exposed to risks that the exchange rate of their functional currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of their assets or liabilities denominated in currencies other than the functional currency.

When considering the asset allocation of the portfolio or Fund, each appointed Investment Manager will consider the likely movement of foreign exchange rates in investment decisions. The Investment Manager may use financial derivative instruments, such as forward currency contracts, to hedge against adverse movements in foreign exchange rates as disclosed in the supplements of each Fund. Each Investment Manager must report on a monthly basis to SAMI that the portfolio or Fund is managed in accordance with the supplement, the Investment Management Agreement and guidelines, where applicable.

The tables overleaf set out the Funds' exposure to foreign currency risk arising from their investments, and include a sensitivity analysis.

Sanlam Institutional Equity Flexible Fund

At 31 December 2017 and 31 December 2016, Sanlam Institutional Equity Flexible Fund did not have an exposure to foreign currency risk arising from its investments.

Sanlam Centre Multi-Asset Real Return Feeder Fund

At 31 December 2016, Sanlam Centre Multi-Asset Real Return Feeder Fund did not have an exposure to foreign currency risk arising from its investments

(b) Interest Rate Risk

Interest rate risks may result from exposures to changes in the level, slope and curvature of the yield curve, the volatility of interest rates, mortgage prepayment speeds and credit spreads.

Interest rates are determined by factors of supply and demand in the international money markets, which are influenced by macro-economic factors, speculation and central bank and government intervention. Fluctuations in short term and/or long-term interest rates may affect the value of the Funds.

The Funds may invest in fixed income securities. Any change to relevant interest rates for particular securities may result in the Investment Manager being unable to secure similar returns upon the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general, have the opposite effect. Other assets and liabilities with the exception of cash and margin cash bear no interest rate risk.

For each Fund the appointed Investment Manager reviews the positions on a regular basis. SAMI will review the positions of the Fund or portfolio at least monthly with the appointed Investment Manager.

(c) Other Price Risk

Price risk is the risk that (a) the value of a financial investment will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or any factor affecting financial investments traded in the market or (b) the risk that the valuations of the underlying Funds into which the Funds invest does not reflect the true value because the values are not verified by an independent third party, or the values of these underlying Funds are not available at the valuation points of the Funds.

Other price risks may result from exposures to changes in the prices and volatilities of individual equities, equity baskets, equity indices, and commodities.

Each Fund is required to be managed in accordance with the prospectus, the Fund supplement and the AIF Rulebook and other guidance of the Central Bank of Ireland. Each Investment Manager is required to report to the Manager each month that the respective Funds have been managed in accordance with the Investment Management Agreement agreed between them.

As the Funds' financial investments are carried at fair value with fair value changes recognised in the Statement of Comprehensive Income, all changes in market conditions will directly affect net assets attributable to holders of redeemable participating shares. The Fund's quantitative exposure to price risk at the reporting date is represented by the financial assets and liabilities at fair value through profit or loss which are analysed in the schedule of investments of each Fund on pages 53 to 65.

Sanlam Africa Equity Fund <i>(50% MSCI EFM Africa ex SA/50% S&P All Africa ex SA Capped NTR Index)</i>	(3.74)	(15.01)	(1,251,823)	(3,087,453)

*Total effect is the impact on Net Assets and Profit, calculated as the total exposure (as detailed in Note 8) multiplied by the benchmark index, calculated from the date of inception for the relevant fund. However, actual results could differ significantly.

**At 31 December 2017 Sanlam Global Investment Fund, Sanlam Global Investment Fund II, Sanlam Global Investment Fund III do not have a benchmark index. At 31 December 2016 Sanlam European Growth Basket Fund did not have a benchmark index.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***18. Risk arising from financial instruments (continued)****(ii) Liquidity Risk**

Liquidity risk is defined as the risk that a Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Exposure to liquidity risk increases because of the possibility that a Fund could be required to redeem its shares earlier than expected. The Funds are exposed to cash redemptions of their redeemable shares on a regular basis. Shares are redeemable at the holder's option based on each Fund's net asset value per share at the time of redemption calculated in accordance with that Fund's constitution. The Funds, therefore, are exposed to the liquidity risk of meeting shareholder redemptions at any time.

The majority of the Funds' financial investments are either listed securities or collective investment schemes trading on a regular basis which are readily realisable. All Investment Managers are required to keep appropriate levels of cash or near cash investments to meet normal day to day liquidity demands, for example from normal levels of investor redemptions and to meet expense payments as they fall due. In addition the Manager performs daily monitoring of cash balances and reports low or overdrawn cash balances to Investment Managers.

In the event of significant requests for redemption of shares resulting in the Funds having to liquidate investments more rapidly than otherwise desirable, in order to raise cash for the redemptions and achieve a market position appropriately reflecting a smaller asset base, the Board of Directors has the ability to levy a dilution charge so that the investors remaining in the Funds are not disadvantaged.

The Company manages its obligation to repurchase shares when required to do so and its overall liquidity risk as follows:

- The articles provide that the Company cannot affect the repurchase of Shares, if after payment of any account in connection with such repurchase, the Net Asset Value of the issued share capital would be equal or less than the minimum amount as specified in the supplement of each Fund.
- The Directors are entitled to limit the number of shares of any Fund repurchased on any dealing day to Shares representing 10% of the total Net Asset Value of Shares (or 25% in the case of a quarterly dealing) of that Fund in issue on that Dealing day. In this event, the limitation will apply pro-rata so that all shareholders wishing to have shares of the Fund repurchased on that dealing day realise the same proportion of such Shares and Shares not repurchased, but which would otherwise have been repurchased, will be carried forward for repurchase on the next dealing day and will be dealt with in priority (on a rateable basis) to repurchase requests received subsequently. If requests for repurchases are carried forward, the Registrar and Transfer Agent will inform the shareholders affected.
- The Articles contain special provisions where a repurchase request received from a Shareholder would result in more than 5 per cent of the Net Asset Value of Shares of any Fund being repurchased by the Company on any Dealing Day. In such a case the Company may satisfy all or part of the repurchase request by a distribution of investments of the relevant Fund in specie provided that such a distribution would not be prejudicial to the interests of the remaining Shareholders of that Fund. The Shareholder however may require the Company to sell such investments on his behalf and pay him the proceeds of sale less any costs incurred in connection with such sale.
- The Directors may at any time temporarily suspend the calculation of the Net Asset Value of any Fund and the issue, repurchase and conversion of Shares and the payment of repurchase proceeds during inter alia any period during which any transfer of Funds involved in the realisation or acquisition of investments of the relevant Fund cannot, in the opinion of the Directors, be effected at normal prices or rates of exchange or any period during which the Directors are unable to repatriate Funds required for the purpose of making payments due on repurchase of Shares in the relevant Fund, or any period when the Directors consider it to be in the best interest of the Company. Where possible, all reasonable steps will be taken to bring any period of suspension to an end as soon as possible.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***18. Risk arising from financial instruments** *(continued)***(ii) Liquidity Risk** *(continued)*

The Funds' policy is to satisfy redemption requests by the following means:

1. Withdrawal of cash deposits;
2. The Funds may borrow within the limits laid down by the Central Bank and in each Fund's supplement;
3. Disposal of highly liquid assets (i.e., short-term, low-risk debt investments);
4. Disposal of other investments; and
5. Searching for new investors.

The Funds invest primarily in marketable securities and other financial instruments, which under normal market conditions are readily convertible to cash.

Sanlam Global Fund of Hedge Funds invests primarily in unregulated underlying funds. These funds may have the ability to suspend redemptions from the fund. Investment funds may suspend redemption for a number of reasons, including, liquidity issues in the underlying portfolio and unsustainable redemptions requests from investors. Restrictions on redemptions through the use of pro-rata reductions to investors' redemption amounts due to a high level of overall investor redemption requests are commonly referred to as gates. Sanlam Global Fund of Hedge Funds' ability to withdraw monies from or invest monies in underlying funds with such restrictions will be limited and such restrictions will limit the Sanlam Global Fund of Hedge Funds' flexibility to reallocate such assets among underlying funds. Sanlam Global Fund of Hedge Funds may be affected by gates or redemption suspensions, applied by the managers of the underlying funds, which will affect its liquidity. To deal with such risks Sanlam Global Fund of Hedge Funds has allocated the affected underlying funds to a side pocket as represented by the Designated Class A shares.

The Funds' policy is to maintain sufficient cash and cash equivalents to meet normal operating requirements and expected redemption requests.

With the exception of the side pocket noted above in respect to Sanlam Global Fund of Hedge Funds, none of the assets of the Company are subject to special liquidity arrangements.

The tables overleaf summarise the maturity profile of the Funds' financial liabilities. Balances due within 6 months equal their carrying amounts, as the impact of discounting is insignificant. The tables also analyse the maturity profile of the Funds' financial assets (undiscounted where appropriate) in order to provide a complete view of the Funds' contractual commitments and liquidity.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***18. Risk arising from financial instruments (continued)****(iii) Credit Risk**

Credit risk is the risk that a counterparty to a financial asset will fail on a commitment that it has entered into with the Fund. A Fund is subject to the possibility of insolvency, bankruptcy or default of a counterparty with which the Fund, as appropriate, trades such instruments. This could result in substantial losses to the Fund.

Each Fund will be exposed to credit risk on the counterparties with which it trades in relation to OTC derivative contracts. Such instruments are not afforded the same protections as may apply to participants trading futures or options on organised exchanges, such as the performance guarantee of an exchange clearing house. Investment Managers who enter into transactions involving financial derivatives are required to abide by the Prospectus and the AIF Rulebook and any breaches must be reported to the Manager.

The various Investment Managers to the Funds have adopted procedures to reduce credit risk related to their dealings with counterparties in respect of each Fund's investments. Before transacting with any counterparty, the Investment Manager or its affiliates evaluate both creditworthiness and reputation by conducting a credit analysis of the party, their business and reputation. The reputational risk of approved counterparties is then monitored on an ongoing basis, including periodic reviews of financial statements and interim financial reports as needed.

In order to reduce exposure to credit losses, Master Netting Agreements (MNA's) are entered into with over-the-counter derivative counterparties, excluding those counterparties executing only spot foreign exchange contracts. While MNA's do not result in an offset of reported assets and liabilities because transactions are generally settled on a gross basis, MNA's do provide for the reduction of credit risk on favourable contracts to the extent of the value of unfavourable contracts in the event of default as all amounts with the counterparty are terminated and settled on a net basis.

A Fund may enter into securities lending, reverse repurchase agreements and repurchase agreements provided that it is within the conditions and the limits laid down by the Central Bank or the purpose of generating income for the Company with an acceptable level of risk. Such arrangements are those where the Company or the Depositary delivers securities to a third party in return for which it is agreed those securities or securities of the same kind and amount should be redelivered to the Company or the Depositary at a later date.

Cash held and amounts due from sale/purchase of securities are with the Company's counterparties. The credit ratings of these counterparties are as follows:

Counterparty	2017 Rating	2016 Rating
Brown Brothers Harriman Trustee Services (Ireland) Limited	A+	A+

No positions are either past due or impaired.

20. Cross liability of funds

The Directors are not aware of any such existing or contingent liability at 31 December 2017 or 31 December 2016. The Company's amended Articles provide for segregated liability between the various Funds.

21. Contingent liabilities

There were no contingent liabilities as at 31 December 2017 or 31 December 2016.

22. Significant events during the year

Sanlam Global Investment Fund, Sanlam Global Investment Fund II, Sanlam Global Investment Fund III and Sanlam Global Investment Fund IV were authorised by the Central Bank of Ireland as designated sub-funds of the Company and launched on 18 July 2017, 1 September 2017, 12 October 2017 and 19 December 2017, respectively.

Effective 27 November 2017 the listing of the Companies Share classes were transferred from the Main Securities Market of the Irish Stock Exchange to the Global Exchange Market.

There were no other significant events during the year.

NOTES TO AND FORMING PART OF THE AUDITED FINANCIAL STATEMENTS*(CONTINUED)**for the year ended 31 December 2017***23. Significant events since the end of the year**

Up to the date of approval of the financial statements, there were no other material subsequent events affecting the Company which necessitate disclosure or revision of the figures included in the financial statements.

24. Auditors fee

Auditor remuneration for the period was EUR 54,573 excluding VAT (2016: EUR 45,402 excluding VAT). Auditor remuneration related solely to the audit of the financial statements for the year ended 31 December 2017. There were no other assurance services, tax advisory services or other non-audit services provided by the auditor of the Company.

25. Off balance sheet arrangements

The Company was not party to off balance sheet arrangements for twelve months from 1 January 2017 to 31 December 2017 or from 1 January 2016 to 31 December 2016.

26. Approval of the financial statements

The financial statements were approved by the Board of Directors on 24 April 2018.

SAMI REMUNERATION POLICY (UNAUDITED)

Purpose and objective

Sanlam Asset Management Ireland Limited (“SAMI”) has implemented a remuneration policy (the “SAMI Remuneration Policy”) in line with the provisions of Article 13 of the Directive 2011/61/EC on Alternative Investment Fund Managers (the “AIFMD”), in particular Annex II, and of the European Securities and Markets Authority’s (“ESMA’s”) “Guidelines on sound remuneration policies under the AIFMD” (the “ESMA Guidelines”) and related guidance as may be issued from time to time.

The purpose of the SAMI Remuneration Policy is to provide clear direction and policy regarding SAMI’s remuneration policies and practices consistent with the principles set out in the European Union (Alternative Investment Fund Managers) Regulations 2013 (the “AIFM Regulations”). The SAMI Remuneration Policy also complies with the overarching remuneration philosophy of the Sanlam Investments Cluster (the “Cluster Policy”) with local adjustments to adhere to regulations applicable in Ireland.

The objective of the SAMI Remuneration Policy and the Cluster Policy is to support SAMI’s and the Sanlam Investments Cluster’s business objectives, and the Sanlam Group corporate values, including prudent risk management, by attracting, retaining and motivating the key talent to achieve these outcomes. The SAMI Remuneration Policy has been designed to be consistent with and promote sound and effective risk management, not encourage excessive or inappropriate risk-taking, eliminate conflicts of interest and be cognisant of SAMI’s Treating Customers Fairly and Conduct Risk policies.

Design

In the design of its Remuneration Policy, SAMI has also taken into account the nature, scale and complexity of its business. In determining the range of activities undertaken, SAMI has given due consideration to the number of funds under management, the type of investments, the investment strategies, the investment location, the distribution models and the investor base. Due consideration has also been given to the resources available to SAMI and the resources and expertise of the various third parties engaged to support SAMI and carry out certain functions on its behalf.

The SAMI Remuneration Policy applies to those categories of staff, including senior management, risk takers, control functions and any employee receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the risk profiles of SAMI or of the Alternative Investment Funds (“AIFs”), including the Sanlam Qualifying Investors Funds Plc (the “Company”), to which SAMI has been appointed as AIFM. The disclosures in this report are made in respect of the SAMI Remuneration Policy and how it applies to the Company and to the persons to whom portfolio and risk management activities have been delegated by SAMI. SAMI has the facility to appoint delegates to carry out discretionary portfolio management activity on its behalf in accordance with its outsourcing policy (the “Investment Managers”). Disclosures are made in accordance with the AIFMD, the European Commission Delegated Regulation supplementing the AIFMD and the ESMA Guidelines.

Risk management

SAMI recognises the important role played by sound risk management in protecting stakeholders. Moreover, SAMI acknowledges that inappropriate remuneration structures could in certain circumstances result in situations whereby individuals assume more risk on the relevant institution’s behalf than they would have done had they not been remunerated that way. The SAMI Remuneration Policy aligns the risk taking behaviour of employees and officers with SAMI’s risk appetite and the risk appetite in respect of each of the funds.

SAMI REMUNERATION POLICY (UNAUDITED) (CONTINUED)**Identified Staff**

The SAMI Remuneration Policy applies to “Identified Staff”. Under the ESMA Guidelines, Identified Staff are defined as follows:

- Categories of staff, including senior management, risk takers, Control Functions and any employee receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers, whose professional activities have a material impact on the AIFM’s risk profile or the risk profiles of the AIF that it manages and categories of staff of the entity/entities to which portfolio management or risk management activities have been delegated by the AIFM, whose professional activities have a material impact on the risk profiles of the AIF that the AIFM manages.
- Any other employee/persons whose total remuneration is within the same remuneration bracket as senior managers (e.g. other high earning staff) and who can exert a material impact on the risk profile of the AIFM or the AIFs under management.

The list of Identified Staff maintained by SAMI is subject to regular review (at least annually by the Board of Directors of SAMI) and is formally reviewed in the event of, but not limited to:

- Organisational changes;
- New business initiatives;
- Changes in role responsibilities; and
- Revised regulatory direction.

Fixed and variable remuneration

In deciding the mix between fixed and variable remuneration, SAMI is mindful of the need to ensure that the basic pay of staff is adequate to remunerate the professional services rendered taking into account, inter alia, the level of education, the degree of seniority and the level of expertise and skills required.

SAMI recognises that variable remuneration is an important tool to incentivise staff. It also gives SAMI or the Investment Managers (and therefore the Company) flexibility such that, in years in which SAMI or the Investment Managers perform poorly, variable remuneration may be reduced or eliminated. In some circumstances, however, variable remuneration, if inappropriately structured, can lead to excessive risk taking as employees may be incentivised to keep taking risk to maintain or increase their variable remuneration. Accordingly, there is a clear and well defined pay-for-performance philosophy that seeks to attract, retain and motivate employees who are accountable and whose behaviours are aligned with SAMI’s strategic goals, good conduct risk practices and Treating Customers Fairly principles.

As an AIFM and UCITS Management Company, SAMI’s revenues are based on a percentage of the NAVs of the Funds, including that of the Company. As a result, its revenues may be more volatile than other types of businesses. SAMI may also be paid expenses and other revenue from the Funds to which it provides services. Variable remuneration allows SAMI to reduce the risk that its capital base is eroded due to the need to pay fixed remuneration costs should trading revenues decline. Owing to the nature of the contracts SAMI enters into with its Directors and their Designated Persons, the ratio of variable pay to fixed pay is considered appropriate but is kept under review.

Decision-making process

The level of variable remuneration within SAMI is dependent on the achievement of individual goals, overall individual performance, the financial results of SAMI, the Sanlam Investments Cluster, the Sanlam Group and the achievement of Treating Customers Fairly outcomes.

Individual goals, consistent with shareholder goals, are set at the beginning of the year and performance is measured through Sanlam’s performance management process. Goals set shall be financial and non-financial in nature. Mistakes resulting in unforced and avoidable losses may be penalised.

SAMI REMUNERATION POLICY (UNAUDITED) (CONTINUED)**Decision-making process** *(continued)*

Variable remuneration paid is based on the previous year's financial results and individual performance outcomes as determined as a result of a formal review of performance carried out in January following the end of the performance year. This timing allows full year financial results to be considered along with other non-financial goals and objectives. Individuals are not involved in setting their own remuneration. Pro-rata payments apply to new appointments based on time in the job over the financial year.

Ratings are used to differentiate and reward individual performance – but do not pre-determine compensation outcomes. Compensation decisions remain discretionary and are made as part of the year end compensation process. Compensation practices do not provide undue incentives for short term planning or short term financial rewards, do not reward unreasonable risk. Short and long-term strategic objectives are measured and rewarded to mitigate unreasonable or excessive risk-taking and provide balance.

Oversight of the Investment Managers' Remuneration Framework

As AIFM, SAMI ensures that the persons to whom portfolio and/or risk management activities have been delegated are subject to remuneration arrangements that are equally as effective as those provisions of the AIFMD. As the discretionary portfolio management activity has been delegated to the Investment Managers, SAMI shall ensure those staff of Investment Managers who engage in discretionary portfolio management activity are subject to a remuneration framework consistent with the provisions of AIFMD. SAMI will assess on a regular basis the appropriateness of the Investment Managers' remuneration framework, the applicable policies and procedures in this regard for continuing compliance with AIFMD, and ensure that updates are made as necessary in line with the applicable regulations. SAMI shall determine, on a case by case basis, whether or not the scope of the mandate granted to a particular delegate is such that the relevant staff of the Investment Manager constitute "Identified Staff" for the purposes of SAMI's Remuneration Policy.

Proportionality

SAMI, as AIFM, may take a proportionate approach, both in respect of how the SAMI Remuneration Policy shall apply to itself and to any relevant delegates (e.g. Investment Managers), in order to ensure compliance in a manner and to the extent that is appropriate to the size and internal organisation of the relevant entity and the nature, scope and complexity of its activities. In assessing what is proportionate, SAMI shall have regard to the provisions contained in the ESMA Guidelines and will focus on the combination of all the criteria mentioned therein.

Quantitative Remuneration Disclosure

SAMI is required under the AIFMD to make quantitative disclosures of remuneration. The AIFMD requirements on quantitative remuneration disclosures apply only to full performance periods and are first applicable to the first full performance period following the authorisation of the AIFM. The financial year and performance period of SAMI ends on 31 December which coincides with the financial year of the Company. Accordingly the quantitative remuneration disclosures provided in respect to SAMI as AIFM relate to the year ended 31 December 2017.

The disclosures set out below are made in line with SAMI's interpretation of currently available regulatory guidance on quantitative remuneration disclosures. As market or regulatory practice develops, SAMI may consider it appropriate to make changes to the way in which quantitative remuneration disclosures are calculated.

The table below provides an overview of the following:

- Aggregate total remuneration paid by SAMI to all employees;
- Aggregate total remuneration paid by SAMI to senior management and other Identified Staff who have a material impact on the risk profile of the Company*; and
- The allocation of aggregate total remuneration paid by SAMI to senior management and other Identified Staff which is attributable to the Company**.

SAMI REMUNERATION POLICY (UNAUDITED) (CONTINUED)
Quantitative Remuneration Disclosure (continued)

	2017 Average Number of beneficiaries	2017 Fixed remuneration paid USD	2017 Variable remuneration paid USD	2017 Carried interest paid by the AIF USD
Total remuneration paid by SAMI during financial year	13	1,377,274	754,108	Nil
<i>Total remuneration paid to employees who have a material impact on the risk profile of the Company:</i>				
Senior management (including executives)	6	932,941	678,767	Nil
Other Identified Staff*	N/A	N/A	N/A	Nil
<i>Allocation of total remuneration paid to the employees attributable to the Company**:</i>				
Senior management (including executives)	6	93,798	68,243	Nil
Other risk takers/other identified staff	N/A	N/A	N/A	Nil
	2016 Average Number of beneficiaries	2016 Fixed remuneration paid USD	2016 Variable remuneration paid USD	2016 Carried interest paid by the AIF USD
Total remuneration paid by SAMI during financial year	14	1,480,743	621,433	Nil
<i>Total remuneration paid to employees who have a material impact on the risk profile of the Company:</i>				
Senior management (including executives)	6	847,564	589,876	Nil
Other Identified Staff*	N/A	N/A	N/A	Nil
<i>Allocation of total remuneration paid to the employees attributable to the Company**:</i>				
Senior management (including executives)	6	72,407	50,393	Nil
Other risk takers/other identified staff	N/A	N/A	N/A	Nil

*There are no Other Identified Staff of the AIFM, in addition to Senior Management of the AIFM, who would have a material impact on the risk profile of the Company.

**As Identified Staff of the AIFM typically provide both AIFMD and non-AIFMD related services in respect of multiple funds, clients and functions of the AIFM and across the wider Sanlam Group, the allocation of aggregate total remuneration paid which is attributable to the Company is calculated based on total assets of the Company which are managed by SAMI as a proportion of the total assets under the management of SAMI at 31 December 2017 and 31 December 2016.

SAMI REMUNERATION POLICY (UNAUDITED) (CONTINUED)**Remuneration Disclosures in respect to Identified Staff of Delegates**

The AIFM has delegated discretionary portfolio management responsibilities to various Investment Managers, many of whom may have financial year ends and performance periods that do not coincide with the financial year and performance period end of SAMI or the AIFs. Accordingly, the provision of meaningful and comparable information in respect to Identified Staff of Delegates for the financial year ended 31 December 2017 is limited.

Notwithstanding the foregoing, the total remuneration for services rendered paid to the AIFM and each Delegate out of the assets of the relevant Fund in respect of this financial year is disclosed in the financial statements.

The AIFM has appointed Sanlam FOUR Investments UK Limited as Investment Allocation Manager to Sanlam Institutional Balanced Fund, Sanlam Institutional Bond Fund, Sanlam Institutional Equity Flexible Fund and as Investment Manager to Sanlam Global Fund of Hedge Funds, representing US\$ 823,507,396 or 88% of assets under management of the Company. Sanlam FOUR Investments UK Limited is authorised and regulated by the Financial Conduct Authority as a BIPRU Firm and, so, it is subject to FCA Rules on remuneration. The rules applying to Sanlam FOUR Investments UK Limited are equally as effective as those under Article 22(2)(e) of the AIFMD and is disclosed on Sanlam FOUR Investment UK Limited's website at <https://www.sanlamfour.com/Pages/pillar-3-risk-disclosure-statement.aspx>.

The AIFM has appointed Sanlam Investment Management (Pty) Limited as Investment Manager to Sanlam Africa Equity Fund, Sanlam Global Investment Fund, Sanlam Global Investment Fund II, Sanlam Global Investment Fund III, Sanlam Global Investment Fund IV and as Investment Manager to Sanlam Institutional Balanced Fund, Sanlam Institutional Bond Fund and Sanlam Institutional Equity Flexible Fund. Sanlam Investment Management (Pty) Limited provides both AIFMD and non-AIFMD related services in respect of multiple funds managed by the AIFM. The allocation of aggregate total remuneration paid by SAMI to Sanlam Investment Management (Pty) Limited in respect to the Company equates to US\$ 464,329 (equivalent to 0.83% of financial services income of Sanlam Investment Management (Pty) Limited) for the year ended 31 December 2017.

Following clarification provided by certain guidance published by the European Securities and Markets Authority (ESMA34-32-352) on 5 October 2017, appropriate contractual arrangements shall be put in place by the AIFM in respect to Delegates to allow the AIFM to receive (and disclose in the annual report) at least information on the total amount of remuneration for the financial year, split into fixed and variable remuneration, on an aggregate basis. Such information shall be disclosed in the financial statements of the Company for the year ended 31 December 2018.

LEVERAGE (UNAUDITED)

Each Fund may employ leverage and borrow cash strictly in accordance with its stated investment policy or investment strategy. Consistent with its investment objectives and policy, a Fund may utilise a variety of exchange traded and over-the-counter (OTC) derivative instruments such as swaps, options, futures and forward currency transactions as part of its investment policy as more fully set out in each Fund's Supplement. The use of derivatives may expose a Fund to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard underlying bonds or equities. Leveraged derivative positions can therefore increase a Fund's volatility.

The use of borrowings and leverage has attendant risks and can, in certain circumstances, substantially increase the adverse impact to which a Fund's investment portfolio may be subject. For the purposes of this disclosure, leverage is any method by which a Fund's exposure is increased, whether through borrowing cash or securities, or leverage embedded in derivative contracts or by any other means. The AIFMD prescribes two required methodologies, the gross methodology and the commitment methodology (as set out in AIFMD Level 2 Implementation Guidance), for calculating such exposure. These methodologies are briefly summarised below.

The commitment methodology takes account of the hedging and netting arrangements employed by a Fund at any given time (purchased and sold derivative positions will be netted where both relate to the same underlying asset). This calculation of exposure includes all Incremental Exposure as well as a fund's own physical holdings and cash.

By contrast, the gross methodology does not take account of the netting or hedging arrangements employed by a Fund. This calculation of exposure includes all Incremental Exposure as well as the Fund's own physical holdings; cash is however excluded from the calculation under the gross methodology.

The AIFMD requires that each leverage ratio be expressed as the ratio between a Fund's total exposure (including any Incremental Exposure) and its net asset value. Using the methodologies prescribed under the AIFMD and implementing legislation, the Company has set a maximum level of leverage, taking into account atypical and volatile market conditions. This maximum level and the actual leverage in respect to each Fund of the Company is disclosed in the table below:

Fund Name	Commitment leverage as at 31 December 2017		Gross Leverage as at 31 December 2017		Commitment leverage as at 31 December 2016		Gross Leverage as at 31 December 2016	
	Maximum permitted	Actual	Maximum permitted	Actual	Maximum permitted	Actual	Maximum permitted	Actual
Sanlam Institutional Equity Flexible Fund	1:1	1:1	1:1	1:1	1:1	1:1	1:1	1:1
