

Investments

Fund Objectives

In order to meet its investment objective, the Fund will invest a minimum of 90% of its assets directly in global equity securities and global equity linked securities which are listed on Recognised Exchanges. The Fund can invest directly in equities, or it can do so indirectly through Underlying Funds. The Fund will be actively managed with no particular geographical, capitalisation or sectoral focus.

Fund Style

The Investment Manager will pursue certain investment themes or styles when selecting investments such as value, quality, momentum, growth, low volatility and core.

Other Allowed Expenses

Trustee fees, custody fees, administration fees, director's fees, legal fees, audit fees, bank charges, regulatory fees.

Note: A higher TER does not imply a poor return, nor does a low TER imply a good return. The current TER may not be an accurate indication of future TERs. Transaction costs are a necessary cost in administering the Financial Product and impacts Financial product returns. It should not be considered in isolation as returns may be impacted. The Fund does not pay performance fees. Full details of fees are contained in the fund supplement, which can be obtained free of charge at www.sanlam.ie

Risk Profile

This fund is deemed to be high risk in relation to other asset classes due to its equity based investment approach and emerging and frontier markets exposure, it may be affected by uncertainties such as international political developments and changes in governmental policy or taxation.

Irish domestic law implementing EU and United Nations sanctions may limit or prohibit investment in particular African markets and this may have an adverse impact on the operations of the Fund. Investing in international companies means that currency exchange rate fluctuations will have an impact on the Fund return. Foreign currency shortages in some frontier markets could reduce the fund's ability to repatriate funds. The investment manager aims to reduce the overall risk by their value and fundamental stance.

Other risks are Settlement and Clearing Risk, Political Custody Risk, Legal Risk, Efficient Portfolio Management Risk, Reinvestment of Cash Collateral Risk And Securities Lending Risk.

By investing into this fund, and in taking the risk, you will need to have patience if you want to achieve the results, and are willing to invest for the long-term and are prepared to tolerate some volatility in the short term, in anticipation of higher returns expected to be received over a five year period and longer.

Regulatory Statement

The Fund is a sub-fund of the MLC Global Multi Strategy UCITS Funds plc, an open ended umbrella type investment company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as a Retail Investors Alternative Investment Fund to which the Companies Act 2014 and chapter 1 of the AIF Rulebook applies.

It is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, telephone +353 1 205 3521, which is authorised by the Manager and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2022. Absa Asset Management (Pty) Ltd is responsible for managing the Fund's investment.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002(CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

Although all reasonable steps have been taken to ensure the information in the Minimum Disclosure Documents is accurate, Sanlam Asset Management (Ireland) Ltd does not accept any responsibility for any claim, damages, loss or expense; however it arises, out of or in connection with this information. The information to follow does not constitute financial advice as contemplated in terms of the South African Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

Collective investments schemes are generally medium to long-term investments.

Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. Changes in exchange rates may have an adverse effect on the value, price or income of the product.

The MLC Global Multi Strategy UCITS Funds plc full prospectus and the Fund supplement is available free of charge from the Manager, the Investment Manager or at www.sanlam.ie. Any offering is made only pursuant to the relevant offering document, the Prospectus, the Supplement, the MDD, together with the current financial statements of the fund, and the relevant subscription/application forms, all of which must be read in their entirety.

Collective Investments are traded at ruling prices and can be engaged in borrowing and scrip lending. Collective Investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax if applicable. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and the variable market factors. Trail commission and incentives may be paid and are for the account of the manager.

International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, settlement risk as well potential limitations on the availability of market information.

The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates.

The portfolio management of all the portfolios are outsourced to Regulated and authorised financial services providers.

Glossary Terms

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Equities

Equities are shares that represent an institution's or individual's ownership in a listed company. These shares are also the "vehicle" through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase which translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling.

Shares / equities are usually considered to have the potential for the highest return of all the investment classes but also have the highest level of risk i.e. share investments have the most volatile returns over the short term. An investment in equities should be viewed with a 7 to 10 year horizon.

Undervalued equity stocks (Value investing approach)

This is a strategy of selecting shares that trade for less than their intrinsic values. Value investors actively seek stocks that they believe the market has undervalued. They believe that the market overreacts to good and bad news, resulting in stock price movements that do not correspond with the company's actual long-term fundamentals. The result is an opportunity for value investors to profit by buying when the price is deflated.

Securities

A general term for shares, bonds, money market instruments and debentures.

Collective investment scheme (CIS)

Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment i.e. administration, financial planning and servicing fees. These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under the management to arrive at a percentage amount, which represents the TER.

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.

Performance data

Performance figures are quoted from Morningstar, using net asset value (NAV) prices, with income distributions reinvested and does not reflect trading in actual accounts. Performance is quoted in the base currency of the Portfolio.

Issue Date

Issue Date represents the date or point in time of the Minimum Disclosure Documents initial release.
