AKI statistics

The Association of Kenya Insurers has now released the 2010 industry results. Insurance penetration in the Kenyan market remains low at 3%. The good news is that Pan Africa Life grew its market leadership position from 23% to 25% market share.

Again, big thanks to all our Clients, staff and other stakeholders for all your support.

4. Rob Ward
5. Josh Wrench

I wish Robert and Nelius all the best in their other endeavors and welcome Josh and Welch on Board!

Money matters

The world has experienced mixed economic conditions in the past months. In our case, we have witnessed food prices triple, which is not helped by the rising cost of fuel. This and the slide of the Ksh against the US \$ has obviously had an effect on investment, and this does not leave out the financial sector. We would like to reassure our clients and shareholders that we are doing our level best to keep their investment as shielded as possible from these ripple effects and look forward to a strong recovery in the near future.

Regards,

Tom
